

Trialled, tested, proven

# Maxima 1

## Red Fescue - Strong Creeping (Festuca rubra rubra)

Maxima 1 is a top-performing red fescue variety, known for its medium green color, excellent disease resistance, and high stress tolerance. Maxima 1 thrives across various soil types and moisture conditions, showing resilience in poor, dry soils. Its fine, needle-like leaves and dense shoot growth create a visually appealing and durable end result.

Maxima 1 also stands out for its strong frost and drought resistance, as well as its ability to tolerate shade and surface water during winter, making it a versatile and attractive choice for both ornamental and landscape use.

### SOWING RATE

Maxima 1 strong creeping red fescue is sown at 30 - 40 g/m<sup>2</sup> (300 - 400 kg/ha).

Full establishment can be expected after 12 - 14 weeks in normal growing conditions.

### BENEFITS:

- Medium green colour.
- Very good disease resistance.
- Stress tolerant.
- Attractive overall appearance.

	COLOUR	DENSITY	DISEASE RESISTANCE <i>(Red Thread)</i>	SALT TOLERANCE	FINENESS
MAXIMA 1	5.0	4.0	6.0	7.0	8.0
