SPRAY RANGE

DELIVERING BEST PRACTISE

This stewardship program is a Nufarm initiative to deliver best practise spraying and drift management techniques. SprayWise has been instrumental in raising awareness amongst the farming community about important spray application parameters. SprayWise consolidates various tools, research results and training courses into one program to assist farmers better manage their spraying activities.

LIQUID FERTILISER READY

'LFR' means that this Croplands product has a pump and plumbing system specifically designed to handle liquid fertiliser through the appropriate nozzles to suit the application.

PARTS BREAKDOWN AVAILABLE

Parts breakdowns are available at www.croplands.com.au or www.croplands.co.nz for products where you see this sign.

LINKAGE 300 AGRIPAK

The OPTIMA 300 litre AgriPak Linkage with the optional 6 metre boom.

All Croplands booms fitted with AirMix® low drift air-induction nozzles as standard.

FEATURES

1. 5-tap control with master on/off lever
2. Isometric gauge for accuracy
3. 10 litre handwash tank
4. 40 litre flushing tank
5. Main tank drain
6. Protected nozzles
7. Stainless steel boom lines
8. Galvanised boom and frame
9. Easily accessible and protected filter
10. Protected pump
11. Venturi tank agitation
12. Easy-adjust boom height slides

300 AGRIPAK LINKAGE WITH BOOM

FEATURES AND OPTIONS INCLUDE

See page 16 and 17 for more options

Spring-loaded boom breakaways to protect from impacts.

Large basket strainer to ensure clean water to the tank.

Standard positive displacement triple diaphragm pump for smooth operation, high flow and wide pressure range.

Optional hose reel with spray lance.

UNIT	WIDTH	LENGTH	HEIGHT	WEIGHT
LA300	1200mm	900mm	1420mm	160kg

Disclaimer: dimensional and weight information supplied is for base model only with no options. This information is subject to change without notice.

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
LA300	300 litre AgriPak linkage sprayer with AR80* liquid fertiliser-ready pump, UCM 5-way controller fitted (no hose reel or boom – see options)	3,167.54	A
LA300/MBX04	As above with 4 metre MBX series boom fitted	4,839.40	A
LA300/MBX06	As above with 6 metre MBX series boom fitted	4,878.83	A
LA300/MSCL-2	As above with double-sided covered boom fitted	5,376.27	A
LA300/XTKIT	As above with XT boom kit fitted c/with X Tender boom jets. Standard X Tender nozzles fitted are #24, which gives coverage of up to 8 metres width depending on height the XT boom kit is mounted. An Ideal choice for hill country or liquid fertiliser applications	4,348.05	A

*The AR80 pump is the market leading Annovi Reverberi triple diaphragm positive displacement pump with poly heads and manifolds. This pump is rated from 0–20 Bar pressure and 80 litres per minute (open-flow). For more information see page 46. The AR30 pump is an Annovi Reverberi twin diaphragm pump rated from 0–40 Bar pressure and 32 litres per minute (open-flow). PTO shaft supplied with all AgriPak linkage models.

LINKAGE 600 AGRIPAK

The OPTIMA 600 litre AgriPak Linkage with the optional 6 metre boom.

All Croplands booms fitted with AirMix® low drift air-induction nozzles as standard.

FEATURES

1. Isometric gauge for accuracy
2. 5-tap control with master on/off lever
3. 15 litre handwash tank
4. Venturi tank agitation (not pictured)
5. Protected pump
6. 80 litre flushing tank
7. Stainless steel boom lines
8. Fully galvanised boom and frame
9. Protected nozzles
10. Main tank drain

600 AGRIPAK LINKAGE WITH BOOM

FEATURES AND OPTIONS INCLUDE

See page 16 and 17 for more options

Hand wash tank fitted standard – ideal for hand washing or in-field filter clean.

A 3-way tap is located by the filter to allow tank selection – it is recommended to use the fresh water flush tank to flush the system in the field after spraying.

Optional heavy duty hose reel with Turbo400 spray gun.

Easy-adjust boom slides make boom height adjustment a breeze.

BOOMS MANUAL FOLD

All Croplands booms fitted with AirMix® low drift air-induction nozzles as standard.

MBX

- » Rugged, galvanised steel construction
- » Nozzles are protected being placed above the boom rail
- » Stainless steel boom tubes for added strength and durability
- » Non-drip nozzles bodies with AirMix® low-drift nozzles fitted
- » Adjustable tension spring breakaway for each boom arm to ensure the arm returns to position
- » Folds neatly behind the sprayer or vehicle (not the MB02 which is fixed)

MAX

- » Hot-dipped galvanised finish
- » Can be plumbed in three sections
- » Stainless steel boom tubing
- » Nozzle bodies fully protected
- » Self-returning breakaway on boom arms to protect against collision damage
- » Self-levelling device standard on 12 metre boom; optional on 8 and 10 metre boom. Self-leveller can be locked if required
- » Quick fitting features allowing to detach hose easier and quicker (see below)

QUICK FITTING FEATURES

- » Adjustable tension breakaway on outer sections
- » Self-levelling centre section standard
- » Boom folds sequentially in a cross-fold style for transport – using the left/right hydraulic kit option, each side can be lifted independently which also automatically locks the self-levelling system. Ideal for lifting over fences at the headland or irrigation sprinklers
- » Ideal boom for small row-cropping, vegetables or undulating farm country

GEX

- » Galvanised steel construction
- » Nozzles protection fitted on outer sections
- » Stainless steel boom tubes with non-drip nozzles bodies and AirMix® low-drift nozzles fitted
- » Adjustable tension spring breakaway for each boom arm
- » Boom folds hydraulically in a cross-fold style. Note: the 8 and 10 metre models have a manual flip-over outer section which needs to be manually secured in the folded position prior to folding the boom for transport
- » Ideal boom for small row-cropping situations or vegetables

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
MHL12	Heavy duty galvanised 12 metre hydraulic folding boom with 24 nozzles, twin ram with auto folding tips, hydraulically plumbed to fold both sides together. Central self-locking self-leveller standard	10,977.16	A
MHL15	As above with heavy duty galvanised 15 metre hydraulic folding boom with 30 nozzles	12,353.11	A
MHL12-2-KIT	Second set of hydraulic hoses to allow left/right individual fold of MHL boom (text on your order)	762.00	A
GEX06H	6 metre galvanised hydraulic folding boom; 12 non-drip nozzle bodies, two rams for folding, hydraulically plumbed to fold together. Weight = 87kg	5,840.40	A
GEX08H	8 metre galvanised hydraulic folding boom; 16 non-drip nozzle bodies, two rams for folding, hydraulically plumbed to fold together. 1 metre of each end is manually unfolded to make the boom 8 metres. Weight = 93kg	7,373.12	A
GEX10H	10 metre galvanised hydraulic folding boom; 20 non-drip nozzle bodies, two rams for folding, hydraulically plumbed to fold together. 2 metres of each end is manually unfolded to make the boom 10 metres. Weight = 96kg	7,872.23	A
GEX-2-KIT	Second set of hydraulic hoses to allow left/right individual fold of GEX boom (text on your order)	762.00	A

Booms shown on sprayers for illustration purposes only. Prices are for booms only.

BOOMS FIREBREAK, UNDER TREE AND COVERED

QUICK GUIDE

Firebreak boom:

- » Ideal for the back of vines or small trailing sprayers
- » 1.5 metre wide with offset nozzles on adjustable swivel nozzle bodies on each end for additional 1.5 metre spray each side
- » For spraying firebreaks, farm tracks, contours, ditches and fence lines

Under-tree boom:

- » Galvanised boom with breakaway – extendable outer section with two nozzles, can be lifted up for transport
- » Perfect for spraying under trees or hedgerows

Shrouded booms:

- » Single or double sided options for sensitive areas
- » For spraying under sensitive crops such as grapes, trellis tomatoes

BOOMS ACCESSORIES

XT Boom Kit in action

QUICK GUIDE XT BOOM KIT

The Croplands XT boomless nozzle kit enables your spray application to be targeted into places a conventional boom may not reach. This kit delivers a uniform spray pattern over a distance of up to 6.5 metres (a wider swath may be possible if the kit is mounted higher than the 90cm as stated in the table below).

Ideal uses would be forestry – spraying under trees; farm tracks and undulating pasture land.

Other useful features and uses include:

- » Under trees in orchards
- » Golf courses and turf applications
- » Hedge rows and fencelines
- » Firebreaks
- » Large droplets for reduced drift risk and to assist with coverage on woody weeds
- » Spraying around obstacles where a conventional boom is not able to be used
- » Standard set up is with #10 nozzles as per the chart below*.

Nozzle size	Pressure (Bar)	Flow (L/min) 2 nozzles	Application rate L/Ha – at swath width shown km/hr							Approximate swath width at 90cm height (XT 2-nozzle kit)
			4 km/hr	5 km/hr	6 km/hr	7 km/hr	8 km/hr	10 km/hr	12 km/hr	
10	2	6.4	166	132	110	95	83	66	55	5.8
	3	7.8	202	161	134	115	101	81	67	6.5

*Disclaimer: all values are calculated application rates in L/ha based on the swath width in the far right column and assuming the pressure and flow can be achieved using the pump on your sprayer. 90cm height from the spray target is recommended using Croplands UA300B trailed sprayers but may vary depending on the sprayer being fitted to, the available mounting height, and the vehicle the XT kit is being fitted to. If the height is adjusted upwards the application rate will be lower; if the kit is adjusted to spray wider than the table suggests, the application rate will be lower. The reverse will be true if the height and/or width is reduced. Larger nozzle sizes are available on request. Ensure your pump has adequate flow to achieve the desired spray rate and sprayed width. For more information visit hypro.pentair.com and search on XT X Tender nozzles.

XTNOZZLEKIT

UOPRK – pressure regulator kit

A5200052 – foam marker and foam

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
XTBOOMKIT	Kit to mount Croplands XT boomless nozzle kit to your sprayer. Kit includes 2 x #10 XT nozzles on adjustable swivel nozzle bodies, steel bracket and 2 x clamps for mounting. Hose and fittings to your pump are not supplied	400.04	B
XTNOZZLEKIT	XT boomless nozzle kit, includes 2 x #10 XT nozzles on adjustable swivel nozzle bodies, no bracket, clamps or hoses supplied	333.55	B
UOPRK	Pressure regulator kit for use with most 12-volt pumps such as FloJet and SHURflo. Ideal for regulating pressure and flow when a small spray boom is being used	97.44	B

LINKAGE CROPAIR 300 | 600

CROPAIR 600

QUICK GUIDE

- » Two speed 800mm fan for different air output requirements with adjustable pitch blades and 6 nozzles per side
- » Brass roll-over nozzle bodies. One set ceramic nozzles supplied, second set optional
- » Heavy duty, galvanised frame
- » 15 litre hand-wash tank for operator safety
- » Flushing tank
- » Large filling lid
- » PTO requirement 50–60HP

CROPAIR 300

QUICK GUIDE

- » Single speed 500mm fan with adjustable pitch blades and 5 nozzles per side
- » Brass roll-over nozzle bodies. One set ceramic nozzles supplied, second set optional
- » Heavy duty, galvanised frame
- » 15 litre hand-wash tank for operator safety
- » Flushing tank
- » PTO requirement 25–30HP

FEATURES INCLUDE

See page 91 for nozzle selection

FAN

On the 600 litre Cropair with 800mm fan fitted, there is an option to blank off the air to outlets not being used – for example in vine crops. This allows more air to be distributed through the remaining outlets and to use low-gear fan speed to reduce the power required to drive the fan – especially useful with smaller tractors.

NOZZLES

On both the 300 and 600 Cropair models, each nozzle body is made of brass, with a non-drip diaphragm to avoid dripping when the main tap is shut off. A selection of two nozzle sizes can be fitted so when the nozzle body is 'rolled over', the nozzle required is easily selected. In the halfway position, the nozzle is shut off.

MANUAL-TAP CONTROL AND ISOMETRIC GAUGE

Each Cropair comes standard with manual-tap control for left/right shut off of the spray-ring on each side. A master on/off lever is also provided, along with a rotational pressure control (PRV) and isometric gauge to accurately set the spraying pressure. For electric controls, see more information on page 64.

TRAILED 300 LITRE

OPTIMA trailed 300 litre sprayers are a very popular option for block-holders and smaller farms all over Australia and New Zealand.

UA300B trailed sprayer with 6 metre boom and 10m hose reel.

All Croplands booms fitted with AirMix® low drift air-induction nozzles as standard.

QUICK GUIDE

- » Translucent UV-stabilised tank with large sump and graduated markings
- » 12-volt models standard with hose reel, 10 metres of 10mm hose and spray lance
- » Large, easy access lid with filling strainer
- » 12-volt, 20 litre per minute (open-flow) pump to enable use with booms to 6 metres
- » Easy access suction filter and regulator for pressure and flow adjustment
- » Safety hitch for safe towing
- » Flotation tyres on sturdy axle
- » Rugged, one-piece chassis
- » Handy parking stand

On models with boom fitted:

- » AirMix® air-induction low drift nozzles fitted standard
- » Fully protected non-drip nozzle bodies on stainless steel boom tubes
- » Spring loaded breakaways top protect boom arms from accidental impact damage

UA300B fitted with new MBX06 boom – model UA300B/20S/6BX.

POWERED by **HONDA**™

UA300B trailed sprayer with 30 metres of hose, 25 L/min Honda-powered pump and spray gun.

UA300B/20/HR30G

FEATURES AND OPTIONS INCLUDE

See page 36 and 37 for more options

HONDA PUMP

UA300B trailed sprayer with 30 metres of hose, 25 L/min Honda-powered pump and spray gun – ideal for nurseries and greenhouses where hand-gun spraying is needed.

XT BOOM KIT

XT Boom Kit in action. For areas where a boom is not practical, consider the XT Boom Kit model – ideal for undulating conditions, firebreaks, contours and forestry work.

REELS
RETRASPRAY

Croplands RetraSpray 12-volt retractable reel will take all the work out of gun spraying. The time and effort saved is well worth the investment – up to 40% more productivity can be expected with the operator not having to lug a heavy hose around or to rewind over 100 metres of hose by hand when making a move to a new area. The Supa-slip hose on the reel will slip around rocks, tree stumps, posts and any other obstacle without snagging.

QUICK GUIDE

- » 12-volt 1/4HP low rev motor directly coupled to the reel
- » Push button hose retraction standard, remote control for rewinding is optional
- » Connect to 12-volt DC power source using heavy duty power cable supplied
- » Remote control option includes roller guides for hose and remote wireless control for rewinding

See page 36 and 37 for more options

CROPPAK 200 | 400 LITRE

These flat-based units are a great choice for a higher capacity utility sprayer. They will sit on a ute tray, RTV tray, tractor tray or trailer. The clever design includes cutaways in the tank to provide baffles to avoid sudden liquid movement – a must if being used on sloping country.

FEATURES

1. 3-stage filtration. Large filling screen under lid; suction filter; pressure filter in lance handle
2. Lance clips onto lid
3. Metal lance with adjustable nozzle. Superior to plastic, higher strength.
4. Graduated, translucent tank. Easy to see liquid level in the tank with level marks
5. Rugged design, locally made. Rotomolded tank has uniform thickness and can take high impact force
6. UV stabilised tank. Many imported models have no UV inhibitor in the material
7. Carry handles ensures safe handling
8. Integrated baffles to avoid sudden liquid movement
9. 6 metres of high quality 20 Bar rated spray hose fitted and hose holders mounted on tank

Long, heavy duty 12-volt power lead with rocker-switch for easy hook-up to your battery.

High quality electrical connector to the pump with waterproof plug for quick hook up and reliability.

US200/15	200 litre CropPak, on-demand 15 L/min open-flow pump, pressure regulator and gauge. 3-way valve enables connection to a boom. 6 metres of spray hose standard with spray lance. Power lead with on/off switch provided	1,390.49	A
US400/15	(Not pictured) 400 litre CropPak, 12-volt 15 L/min Triplex pump with pressure adjusting regulator fitted, 6 metres hose and adjustable spray lance. Accessories available such as small booms	2,050.10	A

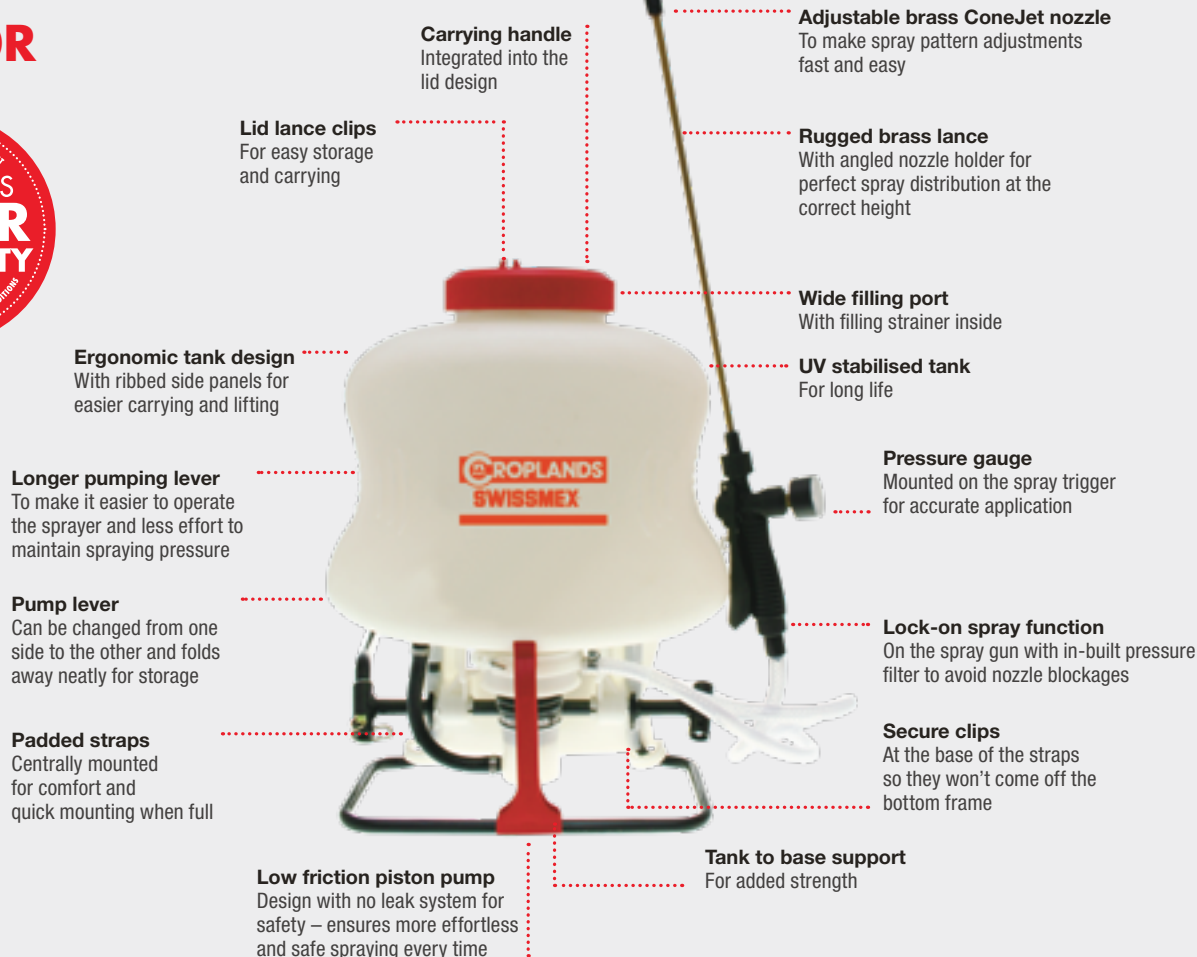

PORTABLE SPRAYERS COMPRESSION AND KNAPSACK

SW503

**TOP
SELLER**

SW540R

INDUSTRIAL

SW189C

Heavy duty 15 litre knapsack designed for industrial use (diesel compatible); wide filling neck, rugged shut-off gun, adjustable nozzle, in-built pressure filter, brass lance. Lance clips into the handle for storage and transport.

SW322-315

High quality heavy duty 9 litre compression sprayer for use with selected solvents and diesel; wide filling neck, rugged shut-off gun, adjustable nozzle, pressure relief valve, in-built pressure filter, brass lance. Lance clips into the handle for storage and transport.

SW320-310

The Acid Sprayer resists hydrochloric muriatic and phosphoric acids. Ideal for staining and etching concrete, and dissolving of rust on metal surfaces.

AGRICULTURAL

SW319

High quality heavy duty 5 litre compression sprayer; wide filling neck, rugged shut-off gun, adjustable nozzle, pressure relief valve, in-built pressure filter, brass lance. Lance clips into the handle for storage and transport.

SW320

High quality heavy duty 7 litre compression sprayer; wide filling neck, rugged shut-off gun, adjustable nozzle, pressure relief valve, in-built pressure filter, brass lance. Lance clips into the handle for storage and transport.

NEW

ASBBS-16A

Rechargeable 12-volt sealed lithium ion battery; voltmeter to see charge level at a glance. Large filling lid. 12-volt diaphragm pump for positive spraying pressure.

PAKMAN

(fitted to sprayer)
Chemical resistant foam back protector, designed to significantly increase comfort for prolonged spraying needs. Fits SW503 15 litre knapsack sprayers. A must for making spraying much more comfortable.

See page 36 and 37 for more options

REELS AND PRESSURE GAUGE ACCESSORIES

Croplands range of manual hose reels include nine models listed below that are made of steel. A steel reel, complete with high quality fittings, that will last years and is a good investment for that reason. The steel on the reel itself is sand-blasted and powder coated for high corrosion resistance. A galvanised base on the larger base-mount models is heavy duty and hot dip zinc plated. The smaller L-R0150 reel has a clever swivel-base design and locking pin.

UNIT	WIDTH	LENGTH	HEIGHT	WEIGHT

BATCHING SYSTEM BATCH MASTER 1200

Dual lids

For simultaneous overhead filling while introducing chemicals for mixing

Large capacity

1200 litre poly tank

Internal knife system

To quickly and safely puncture containers and bags (pictured below)

3" inlet and outlet ports

Honda-powered

Ultra-high flow centrifugal pump for rapid mixing and transfer

Safe platform

Safe, fold-out working platform

Galvanised frame

Heavy-duty hot-dipped galvanised frame

QUICK GUIDE

- » 1200 litre capacity
- » 6.5HP Honda GX 200 powered 3 inch Banjo pump, 1100 litres per minute open flow capacity for rapid mixing and filling
- » 3" (80mm) external filling port for fresh water
- » High-flow venturi for rapid liquid chemical induction from a shuttle source
- » Stainless steel knife inside tank lid for rapid container or bag puncture to speed up mixing
- » Huge mixing nozzles to completely mix contents quickly and efficiently
- » Large Banjo taps for easy control of mixing, filling and batching processes
- » Safe operating platform
- » Forklift points
- » Hot-dipped galvanised frame
- » Extra lid for overhead tank-filling if needed

Above: Stainless steel knife to puncture containers combined with rinsing function.

CHEMICAL MIXING AND TRANSFER

30 LITRE CHEMICAL MIXER

QUICK GUIDE A5033301

- » Can handle liquids, powders and granulated products
- » Venturi suction system with integrated drain valve
- » Three venturi options to adapt to the pump type being used
- » Easy to understand tap controls for chemical mixing, mixer rinse and container cleaning system
- » Integrated lifting handle
- » Simple mounting system to ensure easy fit up to existing sprayers
- » Optional suction probe

See how to use

60 LITRE CHEMICAL MIXER

QUICK GUIDE L-H9351A

- » Large access lid, fully sealed for safety
- » External and internal level markings
- » Dual filling and product agitation jets for rapid mixing
- » Container rinse nozzle capable of rinsing up to 20 litre containers
- » Mixer rinsing nozzle mounted directly under the lid for complete cleaning
- » Large taps for easy operation
- » Venturi with shut off valve
- » Sturdy handle and mount
- » Optional drop-down bracket available
- » High flow capacity via large venturi

STAND ALONE 60 LITRE MIXER

QUICK GUIDE L-H9353B

- » Trolley mounted Croplands chemical mixer for stand-alone mixing operations
- » Same features as itemised at left unit without pump requires a pressurised water source to allow mixing, filling and venturi to operate correctly – the pump on the sprayer could be used
- » Unit with 240-volt pump best used where a water tank and power is available but no existing pressurised water source is available

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
A5033301	30 litre chemical mixer and transfer hopper for use with smaller trailed sprayers, linkage sprayers and traymount units. Includes universal mount, 3-tap control bank, container rinse and venturi options to match to the pump size and type being used	1,779.74	B
L-H9351A	Croplands 60 litre chemical mixer and transfer hopper for use with larger trailed sprayers, linkage sprayers and traymount units. Includes universal mount, taps for mixing, container rinse and system cleaning. Cleaning nozzle mounted directly under lid for complete clean out. Internal and external markings	1,982.75	A
L-H9353B	Croplands 60 litre chemical mixer as described above on a handy trolley frame. Ideal for use at a chemical mixing station where an external pressurised water supply is available using an existing filling pump or similar	2,965.50	A
L-H9353C	Croplands 60 litre chemical mixer as described above on a handy trolley frame with 240-volt centrifugal pump fitted. Ideal for use at a chemical mixing station where an external water tank is available along with mains power to power the pump	7,402.98	A
L-H9355A	Optional spring-loaded drop down mount for Croplands 60 litre mixer model L-H9351A. Ideal where operator height is an issue	1,077.31	D

CHEMICAL MIXING AND TRANSFER

EASYFLOW

CLOSED TRANSFER SYSTEM FOR CROP PROTECTION PRODUCTS

The EasyFlow closed transfer system is designed as a fully closed system for introducing crop protection, herbicides or pest control products into a spray tank or chemical mixer in total safety.

A clever locking system prevents any chance of coming into contact with the product being introduced. The mounting system is simple to install.

QUICK GUIDE

- » Kit includes components needed to install the system, instructions for installation and three chemical container adaptors
- » For use with containers up to 10 litres capacity with 63mm neck threads
- » External fresh water source is needed for rinsing

View the EasyFlow system in action, scan the QR code

CHEMICAL TRANSFER

QUICK GUIDE

- » Easy and accurate chemical transfer is achieved with the AgRunner chemical transfer unit
- » Pump has nylon housing with Viton seals to ensure maximum performance for today's agricultural chemicals
- » A multiple pump-chamber design ensures long life and durability

SAFETY PROTECTIVE EQUIPMENT

TANK CLEANER

Thoroughly clean your sprayer when changing from one pesticide to another with Spraymate™ tank and equipment cleaner. Powerful detergents remove residues from inaccessible areas in the tank and spray lines. It also removes rust and hard water scale and leaves a protective film to prevent corrosion during storage, prolonging the life of your sprayer.

FIREFIGHTERS FIRE SAFETY RANGE

BT1500/FF2

Heavy duty 1500 litre trailed firefighter on galvanised chassis – hook up and go at a moment's notice when the need arises.

SHUB55H firefighter pump

DID YOU KNOW?

All Croplands firefighters are powered by genuine Honda motors. The Honda motor uses an advanced electronic ignition with automatic compression release providing effortless starts in all weather and conditions.

US500/FF1

500 litre traymount firefighter on galvanised steel skid.

SHUMB25LK

MiniBlaze firefighter kit with 2.5HP petrol motor. Quick fill priming port and 1" discharge. Plus 5 metres of 20mm hose with nozzle.

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
SHUMB25LK	MiniBlaze firefighter kit, 2.5HP petrol motor. Quick fill priming port, 1" discharge, 5 metres of 20mm hose with nozzle, 2.5 metres suction hose with filter. Tool kit supplied. Flow rate 50–150 L/min	710.22	B
SHUB55H	Honda GX160-powered Onga firefighter pump. Industrial grade nylon impeller, alloy housing, 3-way discharge outlets and carry handle. 1 ½" priming port. Flow range 100–500 L/min in the 2–5 Bar pressure range. Price is for pump only	1,142.03	B
US500/FF1	Traymount 500 litre firefighter. Galvanised frame, SHUB55H pump, heavy duty steel hose reel with 30 metres of 20mm delivery hose, adjustable nozzle and 3 metre suction kit with filter	4,529.21	A
BT1100/FF	Trailed 1100 litre firefighter with sprung axle, galvanised chassis, eye-hitch, ag-tyres, SHUB55H pump, heavy duty steel hose reel with 30 metres of 20mm delivery hose, adjustable nozzle and 3 metre suction kit with filter. Ideal for farm use (not pictured)	8,489.75	A
BT1500/FF	Trailed 1500 litre firefighter with sprung axle, galvanised chassis, eye-hitch, ag-tyres, SHUB55H pump, heavy duty steel hose reel with 30 metres of 20mm delivery hose, adjustable nozzle and 3 metre suction kit with filter. Ideal for farm use (not pictured)	9,163.45	A
BT1500/FF2	Pro-series trailed 1500 litre firefighter with sprung axle, galvanised chassis with mudguards, tow-hitch, brakes, lights, Land Cruiser wheels, SHUB55H pump, heavy duty steel hose reel with 30 metres of 20mm delivery hose, adjustable nozzle and 3 metre suction kit with filter	12,570.55	A

Please note: trailed firefighters are not legal for road use.

AR DIAPHRAGM PUMPS LOW PRESSURE POLY RANGE

Annovi Reverberi (AR) has developed a new range of diaphragm pumps to suit the changing demands of agriculture. The heads and manifolds of this new range are made from reinforced polypropylene or nylon to allow use with a wider range of products including liquid fertilisers.

See page 51 for controller options

AR80LFP – Ideal for booms up to 12 metres

Open flow	76 L/min
Max pressure	20 Bar
Max RPM	550
Weight	14kg
HP required	3.4

Triple diaphragm, reinforced poly heads and manifolds

Available with

C

MODEL	\$ (EX. GST)	PROD. CAT.
AR80LFP-C	1,195.62	C

AR140LFP – Ideal for booms up to 18 metres

Open flow	132 L/min

AR DIAPHRAGM PUMPS

LOW PRESSURE ALLOY RANGE

The Annovi Reverberi (AR) range of diaphragm pumps have been industry leaders for more than 60 years. Croplands have been fitting AR pumps to their entire sprayer range for 40 years, and supplying farmers and growers with these high quality pumps for the same duration. Rugged, reliable and robust, an AR pump will give years of good service if looked after and maintained.

See page 51 for controller options

AR252 – Ideal for small boom sprayers

Open flow	25 L/min

MOTORISED PUMPS PETROL AND ELECTRIC DRIVE

Croplands have a great range of petrol and electric drive pumps for spraying and semi-industrial applications. Powered by genuine Honda engines, the petrol powered models are bullet proof and will run day in, day out. A full range of spare parts are available for our range, and Honda dealers throughout New Zealand and Australia can supply engine parts and service when needed.

HYPRO PUMPS

CENTRIFUGAL MODELS

NEW TECHNOLOGY

LIFE GUARD SILICON CARBIDE PUMP SEALS

Croplands stocks a good range of Hypro pumps for agricultural sprayers – mostly with Life Guard seals fitted. Stocking pumps with this seal material helps our customers with a pump that will last longer and help resist seal failure.

Typically, the standard seal will fail quite quickly if the pump is run dry for long. Life Guard seals dramatically improve the dry-run survivability of the seal in the case where a pump is run dry for any reason. The Life Guard seal is much more resistant to abrasive products as well, improving the working life of the pump.

9310 SERIES FORCEFIELD CENTRIFUGAL PUMPS

ForceField Technology is a superior wet seal technology that provides the ultimate protection for the mechanical seal and avoids costly downtime.

It protects the mechanical seal against common failures related to dry run and chemical bonding by using a barrier fluid to keep it cool and lubricated. ForceField Centrifugal Pumps actively maintain a pressure differential between the barrier fluid and the pumping solution, which results in longer life and worry free operation.

Hypro pumps are fitted standard to Croplands RoGator self-propelled sprayers. For information on which models suit the various models of RoGators, contact Croplands or your local Croplands self-propelled dealer.

SHURFLO PUMPS

12-VOLT

SHURflo

The Croplands range of 12-volt pumps includes popular models from SHURflo – the leading supplier of diaphragm pumps for agriculture and turf applications. These 12-volt models are commonly used on spot sprayers and small multi-tip boom sprayers.

We have included two heavier duty pumps to accommodate the needs of customers using their pumps in more demanding conditions. The higher flow 5059 series allows for continuous spraying for small booms up to approximately 6 metres.

These pumps are ideal for use in RTV and ATV vehicles, the back of utility vehicles, and small trailed sprayers. This pump model will perform very well in these situations and would be an ideal replacement if you have had failures with your existing set-up in the past.

FLOJET PUMPS

12-VOLT

The FloJet range of 12-volt pumps is designed for small spot spraying and boom spraying operations. FloJet pumps perform well if used correctly and flushed out after use.

FLOJET PUMPS ARE RATED FOR INTERMITTENT USE.

Also, all flow ratings in the information below are described as open-flow at zero pressure. The graph at right – for the FL3501-506 model – shows that when pressure is demanded from a FloJet pump, flow decreases. This should be taken into account when planning which pump is suitable for your application.

3501 Triplex Pump

FL3501-506

- Fully sealed motor for corrosion resistance
- Pressure switch for spot spraying and an internal bypass to ensure pump does not pulsate with small nozzle sizes
- Low pulsation and noise
- Superior pump head sealing
- Excellent priming
- Compact size
- 3/8" threaded ports for use with hoesetails or threaded nipples

Ideal for small boom or spot spraying and some other agricultural uses.

3521 Triplex Pump

FL3521-139

- Maximum flow of 15.1 L/min (open-flow)
- Internal bypass gives this model superior, smooth liquid delivery for multiple nozzles
- Plug-in bayonet connections (1/2") with quick release clips

Suited for small booms and high volume spot spraying. Triplex design makes it an excellent priming option.

FERTILISER AND SEED SPREADER 200 | 500 LITRE TRAILED

AGR-XT500C

DID YOU KNOW?

Croplands range of spreaders are fully tested using the industry standard salt-spray test to ensure corrosion resistance from new.

QUICK GUIDE

AGR-XT300C/AGR-XT500C include:

- » Spun steel hopper, epoxy coated for maximum corrosion resistance
- » Ideal for spreading in pastures, crops, turf areas and fields
- » Ruggedly built – made of steel
- » Sealed gearbox rated for the towing load
- » Stainless steel spinner and vanes fitted as standard equipment
- » Clevis hitch standard, ball-coupling optional at extra cost
- » Agitator optional at extra cost

AGR-XT300C

- » Standard with easy to reach shutter control lever – ideal for use with your ATV 4-wheeler
- » 250 litre capacity, maximum payload 300kg
- » Dry weight: 111kg

AGR-XT500C

- » Standard with remote-mount manual shutter control – perfect for use with your RTV
- » 350 litre capacity, maximum payload 400kg
- » Dry weight: 115kg

ACCESSORIES

AGR-COM1000V27 –
Mechanical remote control

AGR-PA251400 – Agitator

Conveyor shown fitted to the XL500 spreader for illustration purposes only.

AGR-CON8000V70 – Conveyor

FERTILISER AND SEED SPREADER

150 LITRE TRAILED

The AGR-SP150C trailed spreader has a 150 litre capacity hopper capable of carrying up to approximately 180kg of fertiliser, depending on the material you are spreading. This unit is ideal for small holdings, turf areas, sports grounds and lifestyle farms for use with a ride-on mower, ATV 4-wheel motorcycle or RTV vehicle. It is not suitable on hill country but ideal on flat or gently undulating areas. If kept clean, the 150 trailed spreader should give years of use.

QUICK GUIDE

- » Spun steel hopper with epoxy coated hopper for excellent resistance to corrosion
- » Pressed, epoxy coated tubular frame for strength and long life
- » Aluminium-cased gearbox with sealed bearings
- » 15 x 6.00 pneumatic 2-ply turf tyres
- » Adjustable height drawbar with five height settings
- » 5-position adjustment for output utilising a simple lever and preset locking nut
- » L 1520mm, H 1110mm, W 830mm
- » Weight (empty) = 41kg
- » Max load = 180kg

FERTILISER TYPE	SPEED RANGE (KM/HR)	APPROX SPREAD WIDTH (METRES)

FERTILISER AND SEED SPREADER 500 LITRE 3 POINT LINKAGE

The AGR-XL500C 3-point linkage spreader utilises a PTO (power take-off) drive system via a driveshaft which is supplied with the spreader. This turns the stainless steel spinner for spreading fertiliser or seed. Ruggedly built with a spun-steel epoxy coated hopper, this unit is ideal for small tractors capable of carrying up to around 400kg on the linkage with a 540RPM PTO-spline drive to operate the spreader. This unit will be ideal for small farms, grasslands, cropping areas, turf areas and pasture. For row crops, there is an optional double sided conveyor available.

Croplands AGR-XL500C is fitted with a stainless steel spinner – as pictured right.

QUICK GUIDE

- » Spun steel hopper with epoxy coating for excellent resistance to corrosion
- » Pressed, epoxy coated tubular frame for strength and long life
- » Aluminium-cased gearbox with sealed bearings
- » Adjustable stainless steel vanes and filtering grid in the hopper
- » Optional articulated agitator, remote control, double sided conveyor
- » Easy-to-reach 5-position adjustment for output utilising a simple lever and preset locking nut
- » L 1230mm, H 1140mm, W 1190mm
- » Weight (empty) = 63.5kg
- » Max load: 400kg
- » Capacity = 350 litres

APPLICATION

SPRAY MONITORS AND AUTO SPRAY-RATE CONTROLLERS

To know your application rate, a spray monitor is a useful option to see speed, flow rate and spray application rate. For fully automatic spray rate control, Croplands has a number of excellent options to choose from to help your farming enterprise become more efficient.

A4670610-SR200	As above but with a higher flow rated flowmeter (10–200 L/min)	1,484.42	B
Auto spray-rate controllers			
BA5000-GEO3	Croplands fully auto spray-rate controller for use on linkage sprayers. Optional as a fit-up to any new Croplands sprayer or as an upgrade to an existing sprayer. Features include display of two functions on screen, large back-lit display, heavy duty switches, up to 10 pre-set application rates, fully programmable and alarm settings and integrated diagnostics. Kit includes: spray manifold with flowmeter, 3-section valve bank, looms, mount and operating instructions. The kit will require some extra fittings to fit to an existing sprayer – consult your Croplands Dealer or service agent Note: if you require a kit for a trailed broadacre sprayer, contact Croplands to ensure the correct length looms are supplied	3,759.42	B
BA5000-GEO5	As above but with 5 sections Note: if you require a kit for a trailed broadacre sprayer, contact Croplands to ensure the correct length looms are supplied	4,189.00	B
HV2400-BRAG2	Croplands fully auto spray-rate controller for use on horticultural sprayers. Has the same features as the BA5000 (specifications listed above) with the added option on Litres per 100 metres for application. Kit includes: spray manifold with flowmeter, 2-section high pressure valve bank, looms, mount and operating instructions. The kit will require some extra fittings to fit to an existing sprayer – consult your Croplands Dealer or service agent	4,732.30	B
HV2400-BRAG4	As above for horticulture but with 4 high pressure section valves	5,298.35	B
BRAVO180-ARAG3	ARAG Bravo180S fully auto spray-rate controller for use on linkage sprayers. Optional as a fit-up to any new Croplands sprayer or as an upgrade to an existing sprayer. Features include display of two functions on screen, large back-lit display, heavy duty switches, up to 10 pre-set application rates, fully programmable, visual and sound alarm settings, programmable units of measure and GPS input for speed. Kit includes: spray manifold with flowmeter, 3-section valve bank, looms, mount and operating instructions. The kit will require some extra fittings to fit to an existing sprayer – consult your Croplands Dealer or service agent Note: if you require a kit for a trailed broadacre sprayer, contact Croplands to ensure the correct length looms are supplied	5,472.24	B
BRAVO180-ARAG5	Same specifications as above with a 5-section valve bank	6,068.92	B

For more comprehensive information on auto-rate controllers, contact Croplands.

MANIFOLDS, SWITCHBOXES AND COMPONENTS

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
Electric control manifolds and switchboxes			
A871CCR005	Control manifold for auto-rate controllers, for pumps up to 180 L/min, manual PRV, electric bypass (7 sec), dump valve, 80-mesh flushing filter, ARAG Wolf flowmeter, mounting brackets (boom shut-off valves not included)	1,325.54	B
A873CCR002	Control manifold for auto-rate controllers, for pumps up to 280 L/min, manual PRV, electric bypass (7 sec), dump valve, 80-mesh flushing filter, ARAG Wolf flowmeter, mounting brackets (boom shut-off valves not included)	1,377.17	B
G8380C0002	Control manifold for auto rate controllers, for pumps up to 180 L/min, manual PRV, electric by pass (7 section), dump valve, 80-mesh flushing filter, Geoline flowmeter, mounting brackets. (Boom shut off valves not included)	1,378.80	B
G8376088	Control manifold for basic electric control systems. Max flow 180 L/min, 20 Bar rated. Kit includes manual PRV, Regulating valve, dump valve, pressure filter and 3 proportional electric boom shut-off valves	1,305.22	B
G8376077	Control manifold for basic electric control systems. Max flow 180 L/min, 20 Bar rated. Kit includes manual PRV, Regulating valve, dump valve, pressure filter and 5 proportional electric boom shut-off valves	1,900.58	B
A4628707	Highly accurate programmable flowmeter with LCD display and sapphire bearing paddle turbine. 40–800 L/min reading of actual flow, or you can view litres pumped. 2 separately resettable counters. 2 x AA batteries required. Will require T7 male fittings (A249177)	1,112.94	B
G8406008	3 section electric switch box and tractor cables. Requires GC00900009 valve cable to connect control manifold. Suitable for G8376088 control manifold	360.60	B
GC00900009	3 section 5 metre valve cable. Requires G8406008 electric switch box. Suitable for G8376088 control manifold	243.01	B
G8406010	5 section electric switch box and tractor cables. Requires GC00900011 valve cable to connect control manifold. Suitable for G8376077 control manifold	410.00	B
GC00900011	5 section 5 metre valve cable. Requires G8406010 electric switch box. Suitable for G8376077 control manifold	285.15	B

CONTROL KITS ELECTRIC

If you need to upgrade your sprayer to control your boom or air-assisted sprayer, Croplands has the right range of electric controls to suit all applications. Options include 20 Bar rated systems for broadacre and low pressure air-assisted sprayers and 40 Bar rated systems for high pressure sprayers.

Also fitted as options to OPTIMA Linkage sprayers – see page 16.

**SUITS HIGH PRESSURE
ORCHARD SPRAYERS**

TO SUIT LINKAGE AND BOOM SPRAYERS; LOW-PRESSURE AIR SPRAYERS

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
Electric control kits up to 20 Bar pressure – To suit linkage and boom sprayers; low-pressure air sprayers. ARAG available on request			
I-E2012	Entry level electric in-cab control with switchbox. One electric on/off valve shuts off the complete boom from the cab. 3 manual taps on the control manifold can be used for each boom section. A manual pressure regulator with gauge is supplied to allow working pressure to be set for the system	789.05	B
I-E2032	Electric in-cab controller with switchbox. 3-section electric valves for individual section shut off, electric pressure regulating valve and a master on/off can all be operated from the switchbox in the cab or vehicle. Requires a reliable 12-volt power supply	2,033.88	B
I-E2052	As above for 5-section control	2,507.21	B
Electric control kits up to 40 Bar pressure – To suit high pressure orchard sprayers			
I-S4020	Electric in-cab controller with switchbox. 2-section high-pressure electric valves for individual left/right shut off and a master on/off can all be operated from the switchbox in the cab. Requires a reliable 12-volt power supply	1,431.05	B
I-S4021	Electric in-cab controller with switchbox. 2-section high-pressure electric valves for individual left/right shut off, electric pressure regulating valve and a master on/off can all be operated from the switchbox in the cab or vehicle. Requires a reliable 12-volt power supply	2,607.58	B

ACCESSORIES

GPS AND SPRAYING TOOLS

RV117-2295-001 – CR7

GD430-GLO-P-L – Matrix 430

90-02720 – Antenna for Matrix 430

Croplands have a great range of extremely useful tools for checking or upgrading the performance of your sprayer. Below you will find tools to make calibration and maintenance of your nozzles much easier.

ELECTRONIC SPRAY TIP PRESSURE TESTER L-H9210

- » Can measure in psi, kPa and Bar
- » Accurate to within +/- 1 psi, 0.07 Bar or 7kPa
- » 5 year battery life (depending on use)
- » Easily fits to the nozzle body
- » LCD display shows nozzle pressure and unit of measure
- » For test gauge use only – not for continuous use
- » Reads from 3 to 160 psi (11 Bar)

SPOT-ON CALIBRATOR L-H9200

- » Waterproof design, no moving parts
- » Easy one-hand operation, electronic display
- » Reads in GPM or litres per minute
- » Accurate to 0.01 L/min
- » Battery life approx two years (has battery warning indicator)
- » Clear design allows for easy cleaning. Warning: only test your nozzles with water, not with mixed chemicals. Damage to the unit may occur

NOZZLE CLEANER AND MULTI TOOL KIT L-H9220

- » Air-blast nozzle cleaner – simply charge it with air and it will blow out any grit or residue blocking your nozzle
- » Multi tool with brush, plastic pick for removing a pre-orifice or residue, spanner wrench to make undoing nozzles so much easier and a utility hook for removing nozzle filters and the like. A must for all farmers

WINDMATE™ HAND HELD WEATHER METER L-H6001

- » Eight functions including temperature, wet bulb temperature, wind speed and direction, dewpoint, relative humidity, Delta T and comfort index. For more information see page 84 in the nozzle section
- » You simply cannot do without a WindMate™ to be sure you are spraying when conditions are right

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
GPS guidance systems			
GD430-GLO-P-L	Portable, simple guidance Matrix 430 system for use in agriculture. 110mm (4.3") full colour, high-contrast touch-screen with on-screen numerical prompts. Minimal set up needed – guidance options include straight A-B, curved A-B, circle pivot and last pass. Handy return-to-point and boundary functions standard. Area counter displays applied area during operation and elapsed time counter measures current job-time. Standard with patch antenna for use where satellite reception is good. Optional 90-02720 antenna (listed below)	2,935.66	B
90-02720	Upgrade antenna for Matrix 430 to improve GPS reception in areas where signal is weak. Enhances performance of the Matrix 430	1,044.72	B
RV117-2295-001	Raven CR7 system with a 7" field computer with 500S GPS receiver. Customisable in-job layouts, ISO universal terminal and task controller capabilities. Simple to set up and operate, you'll be running confidently in minutes	5,542.52	B
Tools for accurate spraying			
L-H9210	Electronic pressure testing gauge	265.46	D
L-H9220	Nozzle cleaner and nozzle multi tool kit	121.42	D
L-H9200	Spot-On nozzle calibrator	409.06	D
L-H6001	WindMate™ hand held weather meter	317.70	D

NOZZLE SELECTION AND SPRAYING

Spraying is a job that most farmers and growers do on a regular basis – whether it is for pest or disease control, selective or broadcast weed control, fertiliser applications or soil additives. The key aspects of this part of farming are covered in the following sections:

BEST PRACTICE SPRAYING AND DRIFT MANAGEMENT TECHNIQUES

SPRAY DRIFT IS A MAJOR CONCERN IN MOST AGRICULTURAL AREAS TODAY. THE PRESENCE OF SENSITIVE AREAS LOCATED WITHIN CLOSE PROXIMITY TO THE SPRAY TARGET AREA INTRODUCES THE POSSIBILITY OF OFF-TARGET DEPOSITION.

It is more important than ever that the agricultural industry demonstrates responsible chemical usage to reduce the need for severe application restrictions.

The SprayWise stewardship program is a Nufarm and Croplands initiative to encourage best practice spraying and drift management techniques.

Giving you access to tools, research results and training courses to assist you better understand spray application parameters and to better manage your spraying activities.

SprayWise Application Handbooks are used widely by specialist application consultants.

**PRESSURE
RANGE**

1-8 BAR

- **Ideal pressure range:** 2-4 Bar
- Uses: weed control, plant health and liquid fertilisers
- Up to 90% drift reduction

- ✓ Variable droplet spectra from coarse to fine as pressure increases
- ✓ Excellent drift reduction at lower pressures
- ✓ Two-piece for easy disassembly
- ✓ Fast cap fitting

**PRESSURE
RANGE**

1-7 BAR

- **Ideal pressure range:** 3-4 Bar
- Uses: weed control and plant health, both contact and systemic

- ✓ Standard in Polymer
- ✓ High-pressure air-induction nozzle
- ✓ Two-piece with pre-orifice

**PRESSURE
RANGE**

2-6 BAR

- **Ideal pressure range:** 2-3 Bar

- ✓ Two 110° air-induction flat fan nozzles directed at 30°, one forward one back
- ✓ Improves coverage on upright targets and soil clods
- ✓ New style fast-cap that suits Hypro, ARAG and TeeJet nozzle holders

**PRESSURE
RANGE**

2-4 BAR

- **Ideal pressure range:** 2-3 Bar
- Uses: weed control and plant health

- ✓ Pink ceramic orifice for excellent wear and spray precision
- ✓ Compact design, easy to dismantle and clean
- ✓ Excellent coverage potential for selected use and the right spraying conditions

**PRESSURE
RANGE**

1-7 BAR

- **Ideal pressure range:** 3-4 Bar
- Uses: weed control and plant health

- ✓ Excellent value, proven performer
- ✓ Predominantly coarse-medium droplets for good coverage
- ✓ Compact design
- ✓ Protected air inlets to avoid blockage
- ✓ Two-piece for easy cleaning, no seals
- ✓ Also available as an off-centre nozzle

**PRESSURE
RANGE**

1-4 BAR

- **Ideal pressure range:** 1.5-3 Bar
- Uses: weed control and plant health

- ✓ Pink ceramic orifice for long life and precise spray quality
- ✓ Predominantly Very Coarse to Coarse
- ✓ Available in 80° and 110°
- ✓ Anti-clogging design and protected double air-intake orifice
- ✓ Compact design
- ✓ Also available as an off-centre nozzle

NOTE: SPRAY QUALITY DATA may appear finer than previous versions of this chart as manufacturers undertake new testing requirements. All data has been sourced from the manufacturer's websites as at May 2017 (date catalogue sourced from was published is listed in the chart), except for Agrotop TurboDrop TD (iso exit) and AirMix® which were sourced from Nufarm SprayWise Publication. Always check current spray quality information according to ASABE 572.1 or BCPC for older data.

SPRAY QUALITY COMPARISON

SPRAY TIPS BROADACRE

SUGGESTED SPRAY QUALITY AND APPLICATION VOLUMES FOR A RANGE OF SPRAYING SITUATIONS

Often a single nozzle will not be able to do all of the spray tasks that the operator may require, however with at least two well chosen nozzles most operations should be able to be completed. It is useful for applicators to consider the range of jobs they may do throughout the season, and group similar jobs by application volume and spray quality required. The diagram below summarises this for either high or low volume applications, with either a coarse or larger spray quality or a medium spray quality.

APPLICATORS SHOULD ALWAYS REFER TO THE LABEL TO CONFIRM THE SPRAY QUALITY AND APPLICATION VOLUME REQUIREMENTS FOR EACH.

TYPICAL APPLICATION VOLUME	MEDIUM SPRAY QUALITY (LOWER DRIFT RISK AREAS) [†]	COARSE SPRAY QUALITY	VERY COARSE OR LARGER SPRAY QUALITY*
LOWER RANGE 50–60 L/ha (low stubble load) to 70–80 L/ha (high stubble load)	<ul style="list-style-type: none"> Fully translocated herbicides Small to medium sized targets 	<ul style="list-style-type: none"> Fallow spraying with fully translocated herbicides such as Glyphosate 	<ul style="list-style-type: none"> Fully translocated herbicides Medium sized targets, water soluble pre-emergent herbicides Very sensitive areas or NIGHT SPRAYING (no inversion)
HIGHER RANGE 70–80 L/ha (low stubble load) to 100 + L/ha (high stubble load/ dense crop canopy)	<ul style="list-style-type: none"> Contact type products. Small, vertical targets In crop spraying of fungicides and insecticides Retention and coverage on large cereal crops and hard to wet leaf surfaces Requires good conditions for spraying and reasonable buffers to mitigate spray drift risk Penetration and coverage in large and broadleaf crops 	<ul style="list-style-type: none"> Good stubble penetration Pre-emergents Fully Translocated herbicides Contact herbicides onto moderate sized targets Translocated products onto hard to wet surfaces at the higher application volumes Penetration through large cereal crops. Reasonable retention on large, easy to wet broadleaf crops 	<ul style="list-style-type: none"> Pre-emergents Medium sized targets with fully translocated summer fallow herbicides Sensitive areas or NIGHT SPRAYING (no inversion)

[†] Only where permitted on label. ^{*}(Legal requirement when applying 2,4-D products, HIGHER DRIFT RISK PERIODS or AREAS)

DID YOU KNOW?

In the above example a low pressure air-induction, such as an AirMix® nozzle, may do jobs indicated by the BLUE arrow, whereas a high pressure air-induction may be required, such as a TurboDrop or TeeJet TTI, to complete jobs indicated by the RED arrows.

SPRAYING SMALL TARGETS

In broadacre spraying the applicator can adjust the spray coverage by changing droplet size and/or the water volume. The ability to hit small targets can be increased with higher water volumes or by producing more droplets, such as a medium spray quality versus a coarse (where permitted on label). If only few droplets hit a target, then using robust product rates increase the likelihood of delivering the lethal dose. In general, if coverage on small targets critical for the mode of action, such as contact herbicides, then increasing the water rate is more efficient than using smaller droplets.

To optimise application when targeting small grasses it is advisable to increase water rates, regardless of the spray quality or chemistry.

If the water rate used is too low (50–70 L/ha) a MEDIUM spray quality is likely to be more successful than a COARSE spray quality – but only under ideal conditions. Adverse weather conditions, such as inappropriate wind speeds or heat, smaller droplets may reduce the overall level of control compared to that of a COARSE spray quality.

Most robust results on small targets are generally achieved with water rates above 80 L/ha. Many trials over recent years indicate that control of even small grass targets, when using these water rates, is at least as reliable with a COARSE spray quality as it is with a FINE/MEDIUM spray quality.

SPRAYING IN STUBBLE

Stubble retention is an important strategy for conserving soil moisture. When combined with narrower row spacings or increased harvest heights, the remaining stubble can present a challenge to gaining effective spray coverage onto the soil or onto weeds in fallow and in crop.

TOP TIPS

- Increase product rate
- Increase water volume
- Use a COARSE spray quality or larger
- Reduce spraying speeds
- Decrease fan angle in erected stubble
- Increase spray height in erected stubble (only with minimum COARSE spray quality)
- Consider 25cm nozzle spacings if your boom has this facility
- Consider using slower spraying speeds

SNAPCARD APP

The SNAPCARD APP allows water sensitive paper (WSP) cards to be photographed and coverage to be measured.

70cm high, 'stripper front', 4.7 t/ha residue

<10cm high, <2.2 t/ha residue

Baled stubble					
13.6%		26.2%		35.0%	

Table 1. Spray card analysis for stripper and baled stubble treatments, medium droplet size.

Information from the Hart field side group, trials on stubble penetration and pre-emergent efficacy (S.A. 2015–2016, funded by SAGIT) images by Dr Sarah Noack.

SUITABLE CONDITIONS FOR SPRAYING BASED ON A 24 HOUR CYCLE

Windspeeds must be **above 4 km/h** and **less than 15–20 km/h** (refer to label) blowing away from sensitive areas.

Medium spray quality: Delta T: 2–10

Coarse spray quality: Delta T: 2–12

To start spraying, the sun should be about 20 degrees above the horizon, and wind speed and direction consistent for 30–40 minutes.

Windspeed should be **above 4–5 km/h** after sunrise to start spraying

Likely to be the best conditions for spraying

Spraying can only occur if the operator can be certain that a surface temperature inversion is not present.

The safest option is not to spray during this period.

***EXTREME CAUTION REQUIRED**

High inversion risk
Dangerous air movement

Plan NOT TO SPRAY during this period

MANAGING AND MINIMISING THE POTENTIAL OF SPRAY DRIFT

Spray drift is a major concern in all agricultural areas. When applying 2,4-D products:

- The minimum mandatory droplet size is VERY COARSE
- It is recommend that growers follow the advisory statement to use a larger droplet size (EXTREMELY COARSE or ULTRA COARSE) between 3 October to 15 April
- Downwind buffer zones have been established and must be followed
- Boom height is restricted to a maximum of 50cm above apparent target surface (either the crop canopy, average weed height or top of stubble)

For more information on chemical application contact your local Nufarm or Croplands Territory Manager.

The main factors that influence the risk of spray drift occurring are:

- ✓ Conditions at the time of spraying
- ✓ Spray quality/nozzle choice
- ✓ Sensitivity of the target
- ✓ Product choice and rate (including water volume)
- ✓ Adjuvant choice
- ✓ Boom height
- ✓ Spraying speed

Monitor conditions closely

Consider using larger spray quality, higher water rates and managing evaporation with suitable adjuvants (ie. Collide, Activator).

Be aware of higher evaporation risk and thermal activity after midday
Monitor plant stress

Prepare to **STOP** all spraying if windspeeds start to drop

CAUTION REQUIRED
Surface inversion onset likely

Wind must be above 11-12km/h

Often spraying into the early evening is possible in summer when air movement has continued to mix the air and prevent a surface temperature inversion forming.

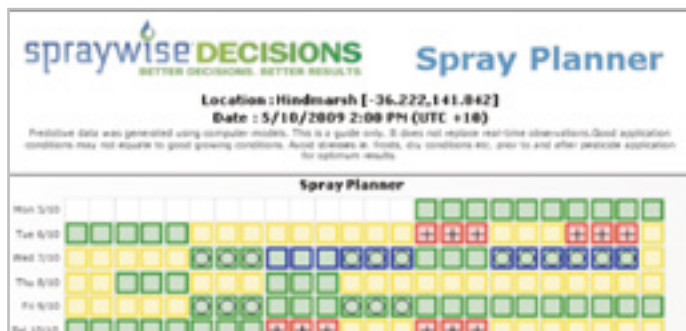

Pay very close attention to changes in wind speed and wind direction throughout the evening.

Only use XC or UC spray quality, reduce spraying speed and boom height to minimise risk of droplets remaining airborne.

Later in the evening air movement can become too unpredictable for safe spraying.

Often by 10-11pm it has become unsafe.

SPRAY TIPS BROADACRE

PLAN

- Utilise tools such as spraywisedecisions.com.au to plan the most appropriate application windows
- Read the product label
- Communicate with neighbours
- Upskill yourself by attending a Nufarm SprayWise training course or one run by specialist application consultants

SPRAY QUALITY

- Choose the nozzle producing the coarsest spray quality without compromising efficacy
- When applying 2,4-D products the minimum mandatory droplet size is VERY COARSE it is also recommend that growers follow the advisory statement of the label and use a larger droplet size (EXTREMELY COARSE or ULTRA COARSE) between 3 October to 15 April
- If needed, include drift-reducing adjuvants such as Collide 700, Activator or Bonza
- Use nozzles at appropriate pressure: conventional nozzles 1.5–3 Bar, pre-orifice nozzles 2–4 Bar, low pressure air-induction nozzles 3–5 Bar, high pressure air-induction nozzles 4–8 Bar

BOOM HEIGHT/FALSE TARGET

- Boom height needs to be adjusted to the height of the false target (stubble height) or the height of the target – whichever is greater
- Keep boom height to a minimum (i.e. 500mm above target/false target for 110° nozzles at 500mm nozzle spacing)
- Increasing the boom height from 500mm to 700mm may double the amount of driftable fines and a boom height increase from 500mm to 1,000mm multiplies them up to four times
- When applying 2,4-D products boom height is restricted to a maximum of 50cm above apparent target surface (either the crop canopy, average weed height or top of stubble)

SELECTING THE RIGHT DELTA T CONDITIONS FOR SPRAYING

- preferred delta T conditions for spraying
- delta T conditions marginal
- delta T conditions unsuitable for spraying
- Conditions are marginal for 'COARSE' or greater spray quality and unsuitable for 'MEDIUM' or finer spray quality.

NEVER SPRAY DURING A LOW-LEVEL INVERSION

SPRAY TIPS BROADACRE

DROPLETS ON WATER SENSITIVE PAPER	CHEMICAL AND TARGET INTERACTION			
	SPRAY QUALITY CLASSIFICATION	NOZZLE TYPE	APPLICATION	TEEJET OPTIONS
	ULTRA COARSE UC	High Flow (HF)	Soil applied pre-emergent herbicides (typically pre-sowing) and fertiliser applications	
	EXTREMELY COARSE XC	Ultra-Lo-Drift (ULD)	Some soil applied herbicides and some translocated herbicides (use if drift control is paramount over efficacy)	Turbo TeeJet Induction
	VERY COARSE VC	TurboDrop (TD)	Translocated herbicides (large targets) and soil applied herbicides (heavy stubble loads)	AI and AIC TeeJet
	COARSE C	Guardian Air (GA), AirMix® (TDAM)	Translocated herbicides, soil applied herbicides, some contact herbicides (use with higher water rates) and some fungicides	AIXR TeeJet and Turbo TwinJet
	MEDIUM M	Guardian Air (GA), AirMix® (TDAM), ALBUZ ADI	Contact herbicides, fungicides and insecticides	Turbo TeeJet
	FINE F	Guardian (GD) (smaller sizes)	Some fungicides, contact herbicides and insecticides	XR and XRC TeeJet
	VERY FINE VF	CAUTION: LARGE AMOUNTS OF DRIFTABLE FINES		

Droplet size classifications are based on BCPC specification and are in accordance with ASAE Standard S-572.

SPRAY QUALITY

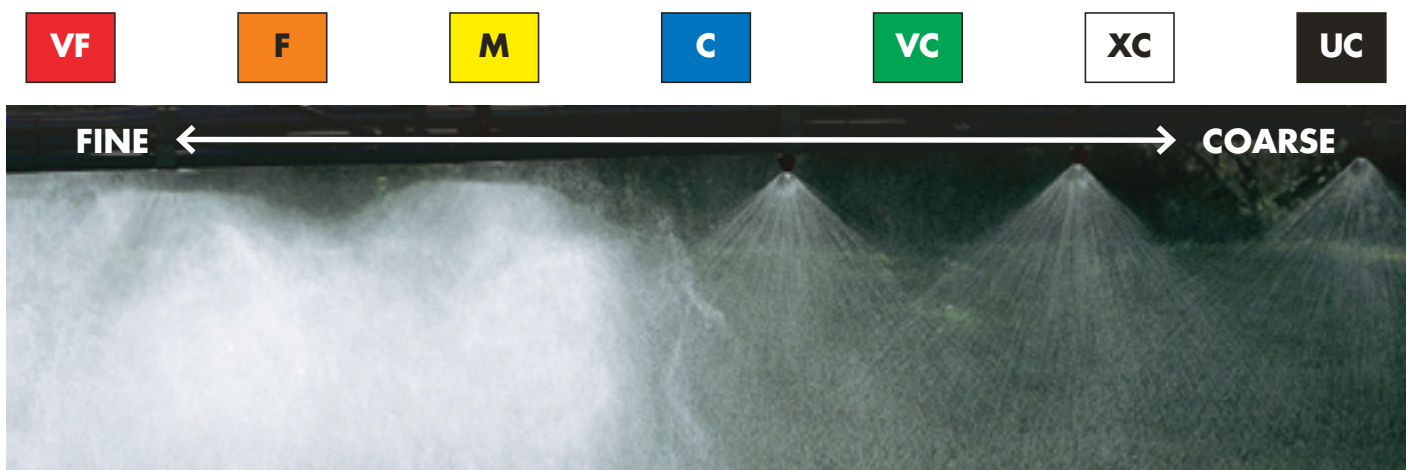

Systems of nozzle classification (BCPC, ASAE, and ASABE 572.1) have been developed around the world to unify and simplify the description of droplet size ranges that different nozzles produce. Accordingly nozzles can be classified as producing ULTRA COARSE, EXTREMELY COARSE, VERY COARSE, COARSE, MEDIUM, FINE and VERY FINE and ULTRA FINE spray qualities.

Applicators should be aware that spray quality information using ASABE S572.1 includes an adjuvant in the spray solution to better reflect actual tank mixes, other standards use water alone.

The spray quality a nozzle produces is very important. Generally, a MEDIUM spray quality will increase potential for coverage, but small droplets are very prone to drift and environmental loss

(evaporation) especially in warm conditions. On the other hand, COARSE spray quality with larger droplets, particularly using pre-orifice or air-induction nozzles, will greatly reduce drift potential but may compromise coverage – especially on small targets using low spray application volume. Choosing the coarsest spray quality without compromising efficacy is the trick.

Refer to the information provided by the chemical manufacturer on their product label, or consult the Nufarm SprayWise Boom Spray Application Guide – available from Nufarm or Croplands. Croplands and Nufarm have selected the best nozzles from around the globe to help our farmers and growers maximise their results when spraying is necessary.

SPRAY NOZZLES

WIDE ANGLE FLAT

Thanks to the exceptional wear resistance of ALBUZ® pink ceramic, these nozzles can be used to spray suspension fertilisers. Flat jet (30° to 165° angle) providing coarse droplets without drift.

FERTILISER

The timely and accurate application of fertiliser can make an enormous difference to crop yields. Liquid application is becoming more and more popular to improve response and to provide increased accuracy, especially where the risk of applying dry fertiliser by conventional spinner-type applicators could mean unwanted nutrient contaminating waterways. Typically uptake of liquid fertiliser is rapid and can provide the right boost to your crop at the right time.

NOZZLE SELECTION
HORTICULTURE

SPRAYWISE ORCHARD/VINEYARD NOZZLE SELECTION

STEP 1

Work out the dilute L/100m rate from the SprayWise Dilute table per row (page 89).

For example, a 1.5 metre grape VSP canopy has a dilute volume of 30 L/100m row (1.5 x 20 L). Use table 1 (page 90) to sanity check what this L/100m rate represents in L/ha. Select your row spacing and follow the column down until you reach 30 or the nearest number. If you follow the row to the left the table will give you the per ha volume. Or you can work reverse from the per ha rate to find the L/100m rate.

1

		Row Spacing (m)							
		1.6	1.8	2	2.1	2.4	2.5	2.7	3
L/ha	100	1.6	1.8	2	2.1	2.4	2.5	2.7	3
	150	2.4	2.7	3	3.1	3.6	3.8	4	4.5
	200	3.2	3.6	4	4.2	4.8	5	5.4	6
	250	4	4.5	5	5.2	6	6.3	6.7	7.5
	300	4.8	5.4	6	6.2	7.2	7.5	8	9
	350	5.6	6.3	7.2	7.4	8.4	8.7	9.6	10.8
	400	6.4	7.2	8.4	8.6	9.6	10	11.2	12.6
	450	7.2	8.1	9.6	9.8	10.8	11.2	12.6	14.4
	500	8	9	10.8	11	12	12.5	14.4	16.2
	550	8.8	9.9	11.6	11.8	13.2	13.7	15.6	17.4
L/100m	100	1.6	1.8	2	2.1	2.4	2.5	2.7	3
	150	2.4	2.7	3	3.1	3.6	3.8	4	4.5
	200	3.2	3.6	4	4.2	4.8	5	5.4	6
	250	4	4.5	5	5.2	6	6.3	6.7	7.5

STEP 2

Work out the total flowrate of your pump per minute/row by matching the per 100m rate with your speed.

For example, you want to drive 8 km/hr. Find 8 km/hr on the top of table 2 and follow the column down until you reach 30 or the nearest number. If you follow the row to the right the table will give you the total flowrate you need per row to put out 30 L/100m at 8 km/hr. The flowrate is 40 L/min per row.

2

		L/100 m															
		L/min															
		Travel Speed (km/h)															
Total	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	2	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	3	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	4	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	5	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	6	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	7	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	8	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	9	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11
	10	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	8	9	10	11

STEP 3

Work out the individual flow rate for each nozzle. If all nozzle are the same size you can simply divide the total flow rate per row by the number of nozzles per row.

For example, we have 24 nozzles per row and needed a total flow rate of 40 L/min. Each nozzle needs to put out 1.66 L/min (40/24). If several nozzle sizes are preferred the volume needs to be split. For example, rather than looking at all 24 nozzles putting out the same you could look at 12 nozzles putting out 25 L/min and 12 nozzles putting out 15 L/min.

STEP 4

Match up pressure and nozzles size to achieve these outputs in table on page 91.

NOZZLE SELECTION SPRAYWISE DILUTE

General guideline to dilute volume in orchards and vineyards.

L/100 m per m canopy height		20	25	30	35	40	45	50 ... 70
	Fungicides							
	some Miticides, PGRs							
	Fungicides							
	some Miticides							
	Fungicides							
	some Miticides							
	Insecticides, some Oils							
	some Oils, PGRs							
	Fungicides	VSP	Sprawl					
	some PGRs		VSP	Sprawl				
	Fungicides							
	some Miticides							
	Fungicides							
	some Insect./Miticides							
	Insecticides							
	Fungicides							
	some Insect./Miticides							
	Fungicides	Trellis						
	some Insect./Miticides							

 = indicates Dilute Volume, sprayed to the point of run-off

 = indicates light Flood Volume, above the point of run-off (some miticides, insecticides and PGRs may benefit)

Example: A 3m high apple canopy should need a dilute rate between 60 and 75 L /100 m (3 x 20 or 3 x 25). As a sanity check, at a rowspacing of 4 m that converts to 1500 to 1900 L/ha (see table next page). If not sure which way to go, as a sophisticated guess, the middle should be close, e.g 70 L/100 m.

IMPORTANT:

- Volumes are given for full canopy.
- Volumes may vary according to canopy type, e.g. VSP vs Sprawl, shape and density. Use the lower end of the spectrum for easier to cover targets, e.g in grapes use 20–25 for VSP and 25–30 for Sprawl.
- Height considers canopy height only - excluding the trunk.
- Guidelines assume that the sprayer is set up to cover the canopy height. In early season grapevine applications the minimum sprayer width becomes the canopy height! For example, a QM head covers 1 m. It can not be reduced to cover 10 cm shoots only. Therefore the dilute volume has to operate on the minimum width the equipment can produce.

Rate for Early Season Applications in Deciduous Tree/Vine Crops (in L/100 m per m Canopy Height)

Budburst	1st Spray BB + 10 days	2nd Spray BB+20 days	3rd Spray BB+30 days
14L (70 % of 20 L)	16L (80 % of 20 L)	18L (90 % of 20 L)	Full rate

Formula		L/100 m = L/min x 6 ÷ speed																	L/min = L/100 m x speed ÷ 6																

NOZZLE SELECTION HORTICULTURE

TREE AND VINE CROPS CERAMIC CONE NOZZLES FOR HORTICULTURE

NOZZLE TYPE	ORDER CODE	\$ (EX. GST)	PROD. CAT.
ALBUZ ATR 80°	AZ-ATR-**-80C ** denotes colour, e.g. YW	13.40	C
			
FEATURES AND SPECIFICATIONS <ul style="list-style-type: none"> ✓ Hollow cone 80° ✓ Precision polished pink ceramic surfaces for long life ✓ Easily dismantled for cleaning ✓ Perfect sealing of swirl chamber for precise flow rate ✓ Pressure range 0–25 Bar (optimum 8–15 Bar) ✓ For tree, vine and trellis crops ✓ Ideal for fungicides and insecticides ✓ Fine to very fine drops for excellent spray coverage ✓ European colour coded (see chart below for pressure, flow rates and colours) 			
 			

**Colour codes: WE = white, LC = lilac, BN = brown, YW = yellow, OE = orange, RD = red, GY = grey, GN = green, BK = black, BE = blue, PE = purple

NOZZLE TYPE	ORDER CODE	\$ (EX. GST)	PROD. CAT.
ALBUZ ATR 60°	AZ-ATR-**-60C ** denotes colour, e.g. YW	13.40	C
			
FEATURES AND SPECIFICATIONS <ul style="list-style-type: none"> ✓ Hollow cone 60° (note – white and purple only available in 80°) ✓ Precision polished pink ceramic surfaces for long life ✓ Easily dismantled for cleaning ✓ Perfect sealing of swirl chamber for precise flow rate ✓ Pressure range 0–25 Bar (optimum 8–15 Bar) ✓ For tree, vine and trellis crops ✓ Ideal for fungicides and insecticides ✓ European colour coded 			
 			

**Colour codes: WE = white, LC = lilac, BN = brown, YW = yellow, OE = orange, RD = red, GY = grey, GN = green, BK = black, BE = blue, PE = purple

NOZZLE TYPE	ORDER CODE	\$ (EX. GST)	PROD. CAT.
ALBUZ TVI	AZ-TVI-****-80C **** denotes size, see table below	38.56	C
			
FEATURES AND SPECIFICATIONS <ul style="list-style-type: none"> ✓ Air-induction hollow cone nozzle (venture system) ✓ Large drops filled with air for drift control ✓ Precision polished pink ceramic surfaces ✓ Compact length (19mm) ✓ Perfect sealing of swirl chamber for precise flow rate ✓ Ideal for fungicides and insecticides ✓ Coarse to ultra-coarse droplets for drift control ✓ ISO colour coding (see chart below)

NOZZLE SELECTION BODIES AND CAPS FOR HORTICULTURE

- Caps for use with TurboDrop® AI nozzles in horticultural applications

- Nozzle bodies and o-rings used on Croplands sprayers for horticulture

Note – the complete nozzle body, when ordered from Croplands, comes with a cap/caps to suit. When ordering caps and o-rings to suit TurboDrop® AI nozzles, use the codes on the right-hand side of the table below.

QUICK GUIDE

- » Choose the correct cap to suit the nozzle body on your sprayer
- » The TurboDrop® uni narrow angle nozzles click together and remain in the cap once assembled. They cannot be disassembled – so choose the cap you need
- » Suitable o-rings are required for a complete seal – see table below

TURBODROP® NOZZLES

NARROW ANGLE AI

DESCRIPTION	HOW TO ORDER	PRESSURE RANGE	\$ (EX. GST)	PROD. CAT.
 <ul style="list-style-type: none"> • High pressure air-induction nozzle • 20, 40 and 60° options • Fully ceramic injector and exit tip • Pressure range 6–25 Bar • Modular construction 	<p>Size i.e. 04</p> <p>TDCFFC6004UNI</p> <p>Angle i.e. 60°</p>	 <p>6–25 BAR</p>	29.72	C

For choosing the right cap to suit the TurboDrop® narrow angle AI nozzles and nozzle body, see previous page.

KEY FEATURES

- Narrow angle horticultural flat fan venturi nozzle designed specifically for horticultural applications
- All wearing components made from high quality ceramic material – ideal for reducing wear when using abrasive powders and granulated formulations in suspension
- ISO colour coded for easy identification
- Coarse to extra coarse droplet for effective drift reduction, even at high pressure
- High droplet speed for good projection and excellent penetration over a wide pressure range
- European JKI approved for up to 90% drift reduction

USES

- Axial-type air-blast fans for specific applications (i.e. HiCane application in kiwifruit)
- Top nozzles on airblast fans to reduce drift in upper canopies
- Croplands Quantum Mist sprayers for early season spray applications to reduce drift and improve coverage on tree branches, buds and vine cordons

SPRAY TIPS COVERAGE

CLAY MARKERS

Their main use pattern is to protect fruits and leaves from sunburn. By far the most visible residues are produced by Surround which makes it an excellent product for the assessment of coverage. Spraying with Surround provides the advantage to see coverage over the entire canopy as a whole as well as in detail. Uneven banding or shading in the canopy can be picked up very effectively. Surround is the best method to demonstrate excessive run-off.

An assessment can be carried out soon after application, once the clay marker has dried. The sprayer can be modified according to shortcomings. This continuous workflow makes working on the set-up very effective.

A good visual spray indicator rate is 1.25kg/100 litre dilute volume. If a concentrate spray volume is used the x-factor rules must be applied.

WATER SENSITIVE PAPER

Water sensitive paper has the advantage that it is very easy to handle (but watch out for moisture) and store (used and unused) which make it an ideal tool for documentation. It can be assessed straight after the application and like clay, it is excellent to be incorporated into the work flow of the set-up.

It provides only a small snapshot of the canopy target and great care needs to be taken to produce a representative standard when placing the papers into the canopy. As a rule of thumb, if three out of ten papers show inadequate coverage the set-up needs improvement.

FLUORESCENT DYE

The glow of fluorescent dye in the light of a fluorescent torch under dark conditions can be quite spectacular. Even the tiniest droplets show up. The observer needs a fluorescent torch. Assessments are normally carried out in the night which makes it difficult to change set-ups on the go. Alternatively, leaves and fruits can be picked after application and observed in a darkroom during the day.

SNAPCARD APP

The SNAPCARD APP allows water sensitive paper (WSP) cards to be photographed and coverage to be measured.

ORDER CODE	DESCRIPTION	\$ (EX. GST)	PROD. CAT.
L-M1111	1 litre fluoro dye	133.97	D
L-M1115	4 litre fluoro dye	398.46	D
20301-1	Water sensitive paper 76 x 26mm (3" x 1") pack 50	74.68	D
20301-2	Water sensitive paper 76 x 52mm (3" x 2") pack 50	124.05	D

SPRAY TIPS NOZZLE WEAR

Nozzle orifices are produced with different materials, the most durable is ceramic, followed by steel and various polymers. Brass orifice nozzles are made from the least durable material.

Worn or damaged nozzles will produce an uneven spray pattern with serious implications for efficacy. Worn or damaged nozzles in spray units without an automatic rate controller will increase the output, spoil calibration, and may create unnecessary extra costs due to over application.

Most new sprayers have rate controllers that will compensate by measuring liquid flow and adjust accordingly.

However, they will cause under supply to the rest of the nozzles to adjust for the extra output of the worn nozzles. Again, this may result in an uneven spray pattern.

Nozzles should be checked for wear at least once per season. As a rule of thumb, nozzles made from durable plastic will need replacement every two years, nozzles with steel orifices should be replaced every three years and nozzles with ceramic tips should be replaced every four to five years.

These time frames will decrease with heavy use, especially when spraying abrasive chemicals.

EFFECT OF NOZZLE MATERIAL ON NOZZLE WEAR: ACCELERATED WEAR TEST

Source: TeeJet

UNIFORMITY OF SPRAY

Uniformity of spray is affected by:

- » Worn or damaged nozzles
- » Nozzle type, spacing and height

- » Boom movement, stability
- » Liquid properties (adjuvants can have an uniforming effect, e.g. LI 700)

Source: TeeJet

NEW SPRAY TIPS

Produce a uniform distribution when properly overlapped.

WORN SPRAY TIPS

Have a higher output with more spray concentrated under each tip.

DAMAGED SPRAY TIPS

Have a very erratic output – over applying and under applying.

FLOW RATE

$$\text{L/min/nozzle} = \frac{\text{L/ha} \times \text{km/h} \times \text{W(m)}}{600}$$

For example, a farmer wants to spray 70 L/ha, drive with a speed of 18 km/h and his boom has a nozzle spacing of 50 cm:

$$\text{L/min} = \frac{70 \text{ L/ha} \times 18 \text{ km/h} \times 0.5 \text{ m}}{600} = 1.05 \text{ L/min}$$

To do so he needs to use a nozzle that delivers 1.05 L/min. He has several options, for example, he could use an 025 nozzle size at 3.5 bar or an 02 size at 5.5 bar (see table).

L/min/nozzle = nozzle flow rate in litre per minute
L/ha = water application rate per hectare
km/h = driving speed
W = width of nozzle spacing in metres
600 = constant

TRAVEL SPEED

$$\text{Speed (km/h)} = \frac{\text{Distance (m)} \times 3.6}{\text{Time (sec)}}$$

For accurate application it is important to calibrate the speed of the tractor. An easy way to do so is to drive in the gear the application will be done in, measure the time it takes to travel 100 metre and apply this simple formula. For example, it takes the farmer 20 sec to drive 100 metre. His application speed is 18 km/h.

$$\text{Speed (km/h)} = \frac{100 \text{ m} \times 3.6}{20 \text{ sec}} = 18 \text{ km/h}$$

APPLICATION RATE

$$\text{Application rate (L/ha)} = \frac{\text{L/min/nozzle} \times 600}{\text{km/h} \times \text{W}}$$

PRESSURE

1 bar (bar) =
» 100 kilopascal (kPa)
» 14.5 pounds per square inch (PSI)

1 pound per square inch (PSI) =
» 6.89 kilopascal (kPa)
» 0.0689 bar (bar)

As a rule of thumb, to double the flow through a nozzle, the pressure must be increased four times. Higher pressures increase drift (less so for AI nozzles) and increase the rate of orifice wear.

SPOT/BAND SPRAYING

For spot and band spraying, the same formula can be used but W (nozzle spacing) becomes the spray width divided by the number of directed nozzles.

For example, a grower directs 3 nozzles over a 1 metre strip:

$$W = \frac{1 \text{ m}}{3 \text{ nozzles}} = 0.33 \text{ m}$$

TERMS AND CONDITIONS OF SALE

The following terms of trade, as amended from time to time (Terms of Trade) shall be incorporated into and form a part of every Contract (together, the Agreement) between the person named as the Buyer (Buyer) in the Contract and the Company for the supply by the Company of Goods and/or Services, (together, Products) unless specifically excluded in writing and signed by both Parties. Any instructions received by the Company from the Buyer for the supply of Products shall constitute acceptance of these Terms of Trade.

1. INTERPRETATION

- 1.1 Defined Terms: In the Agreement, unless the context otherwise requires, the following words have the following meanings:
- (a) Contract means each contract (which includes either a faxed, mailed or emailed copy of the customer purchase order) between the Parties which specifies the Products the Buyer will purchase from the Company.
 - (b) Goods means the goods supplied from time to time by the Company to the Buyer as specified in a Contract.
 - (c) GST means goods and services tax payable at the applicable rate in accordance with the Goods and Services Tax Act 1985.
 - (d) Notice means:
 - (i) for a change/s to the Company's price list, one month's prior written notice to the Buyer; and
 - (ii) for a change to an individual Product, two days prior written notice.
 - (e) Parties mean the Company and the Buyer.
 - (f) PPSA means the Personal Property Securities Act 1999 including the Regulations unless the context otherwise requires.
 - (g) Services means the services to be provided by the Company to the Buyer as specified in the Contract.
- 1.2 PPSA Terminology: Words in these Terms of Trade which are defined in the PPSA, have the same meanings as in the PPSA and the Regulations unless the context otherwise requires.

2. PAYMENT

- 2.1 Date: Payment for the Products is to be made in full, by the Buyer, and without deduction, counterclaim or set-off as follows:
- (a) for Goods, by the 20th of the month following delivery; and
 - (b) for Services by the 20th of the month following the invoice date for the Services; in each case time being strictly of the essence, unless otherwise agreed in writing.
- 2.2 Payments: All payments by the Buyer to the Company for the supply of Products must be paid to the Company in cleared funds. Part payment will not compromise the Company's rights to recover the balance owing nor will it constitute a discharge or partial discharge of the Company's security interest in any Goods.
- 2.3 Returns: The Buyer may not return Goods supplied by the Company unless the Company agrees in writing.
- 2.4 Failure to Pay: If the Buyer fails to make payment by the due date, the Company, without prejudice to its other rights or remedies, shall be entitled to charge the Buyer interest from the due date at a rate of 5% per annum above the current overdraft rate charged by the Company's bankers, compounding monthly on the unpaid balance owing on the first day of each month until payment in full is received by the Company, such interest to accrue after as well as before judgment. Further, any expenses, disbursements and legal costs incurred by the Company in enforcing any rights in the Agreement shall be paid by the Buyer, including any reasonable solicitor's fees or debt collection agency fees.
- 2.5 Credit Arrangement can be Terminated: The Company has the absolute right to terminate any credit arrangements with the Buyer and to substitute cash-on-delivery payment terms at any time, without prior notice or reason being given.
- 2.6 Immediate Payment: Notwithstanding anything contained in the Agreement, all payments (whether due or not), shall become immediately due to the Company if:
- (a) the Buyer fails to comply with the terms of the Agreement; or
 - (b) the Buyer commits an act of bankruptcy; or
 - (c) the Buyer enters into an arrangement or composition with its creditors;
 - (d) if the Buyer is a company:
 - (i) the Buyer does anything that would make it liable to be put into liquidation;
 - (ii) a resolution is passed or an application is made for the liquidation of the Buyer;
 - (iii) a receiver or statutory or official manager, or a person in a similar position, is appointed over all or part of the Buyer's assets and undertaking; or
 - (iv) any act of insolvency is committed.

3. PRICE

- 3.1 Prices: Prices are subject to alteration:
- (a) if Goods, on Notice from the Company and all Goods shall be charged at prices ruling at time of despatch.
 - (b) if Services, upon two days prior written notice from the Company and all Services shall be charged at the rates specified in the Contract.
- 3.2 Change in Price: Any change in price arising from imposition of or change in Government duties, levies, fees and taxes of any type whatsoever shall be for the Buyer's account, shall be invoiced accordingly and shall be deemed to be part of the purchase price.
- 3.3 GST: All prices listed are exclusive of GST.

4. COMPETING SECURITY INTERESTS

- 4.1 Competing Security Interests: If any other person has a security interest in collateral which includes the Goods supplied by the Company, the Company may, as a condition of supplying the Goods, require the Buyer to procure the signing of a deed (even if the Company has previously supplied Goods to the Buyer without requiring this) which:
- (a) confers rights on the Company to recover all amounts which the Buyer is or becomes liable to pay, or to indemnify, or reimburse the Company in accordance with the Agreement in priority to all other secured parties; and
 - (b) acknowledges the Company's priority rights:
 - (i) in relation to all Goods in which the Company has a security interest; and
 - (ii) over payments received by the Company (including electronic funds transfer pursuant to a direct debit authority executed by the Buyer in the Company's favour); and
 - (c) includes provisions acceptable to the Company as to the exercise of enforcement rights in relation to Goods; and
 - (d) is otherwise acceptable to the Company in its discretion.

5. DEFAULT AND ENFORCEMENT RIGHTS

- 5.1 Default Event: If the Buyer fails to pay any amount owing on the due date or commits any other default under the Agreement and any such default continues for seven days, or any of the events set out in clause 2.6 occur or the Company in its absolute discretion forms the opinion that the Buyer cannot or will not be able to pay its debts to the Company as they fall due (each of such to be a Default Event), then:
- (a) the Company shall be entitled to refuse to provide any further Goods and/or Services to the Buyer;
 - (b) the Company may exercise any or all of its rights pursuant to any security interest it has;
 - (c) the Company may require the Buyer, at its expense, to promptly return to the Company all Goods supplied by the Company which have not been fully paid for; and
 - (d) the Company may by written notice to the Buyer cancel the Agreement;
- and any rights exercised by the Company pursuant to this clause shall not in any way limit the Buyer's liabilities under the Agreement including without limitation the Buyer's obligations and liabilities pursuant to the indemnities contained in the Agreement and/or to pay damages for any breach nor preclude the Company from exercising any other right or remedy (in equity or in law) that may be available to it.
- 5.2 Exercise of Rights: The following provisions apply to the exercise of the Company's rights under the Agreement:
- (a) the Company may exercise a right under the Agreement alone, or at the same time as exercising any other rights, powers or remedies available to the Company.
 - (b) the Company does not need to notify the Buyer or any other person first before the Company exercises any rights (unless provided otherwise in the Agreement or by law).
 - (c) any delay by the Company in exercising any of its rights will not affect the subsequent exercise of any other rights.
 - (d) the Company will not be liable or accountable to the Buyer or any other person for any loss caused by:
 - (i) the exercise or attempted exercise of any of the Company's rights; or
 - (ii) a failure by the Company to exercise, or any delay in exercising, any of the Company's rights; or
 - (iii) the manner in which the Company exercises any of its rights; whether or not resulting from a mistake or error of judgment.

6. DELIVERY AND RISK IN GOODS

- 6.1 Delivery:
- (a) Delivery to the Buyer shall be deemed to take place when the Goods leave the company's premises.
 - (b) Goods are deemed to leave the Company's premises when the Buyer or the Buyer's agent signs a receipt acknowledging the delivery of a quantity of Goods. If the Buyer pays for the freight of the Goods, the freight carrier is deemed to be the Buyer's agent.
- 6.2 Risk: The risk in the Goods shall pass to the Buyer when the Goods leave the Company's premises.
- 6.3 Freight: The Company will pay freight charges on consignments where individual orders exceed a minimum value of \$2,000.00 (excluding GST). Where an individual order fails to reach this value freight will be charged at the Company's standard commercial rates. The minimum freight charge is \$4.50.
- 6.4 Order Size: All orders are to be of such size and composition as are normally sold by the Company. Minimum order value is \$50.00 + GST.
- 6.5 Acceptance of Order: All orders by the Buyer for Goods are deemed to be an offer to purchase the items specified in the order. The Company reserves the right to accept, in whole or in part, any order submitted by the Buyer. The supply of any Goods by the Company constitutes acceptance of the order only for the Goods for which an invoice is issued. An order may be cancelled by the Buyer only before delivery and with the Company's prior written consent.
- 6.6 Possession: The Buyer does not have the right to possess the Goods until delivery.

- 6.7 Delivery date or time: Any time or date for delivery given by the Company is only an estimate and the Company shall not be liable for the direct or indirect consequences of a delay however arising. The Buyer acknowledges that the Company will not accept any liability for any claims or losses (direct or indirect) arising from its failure to meet the delivery date (if any).
- 6.8 Instalment Delivery: The Company reserves the right to make deliveries in instalments, in which event each instalment will be a separate contract on these terms.
- 6.9 Surcharge: Where the Goods are delivered on Company-owned pallets, a surcharge may apply. A credit will be given when the pallet is returned in a satisfactory condition to the Company's issuing premises.
- 6.10 Delivered Quantity: All deliveries shall be deemed to have been delivered without shortage, in quantity unless the Buyer notifies the Company of such shortage, if in writing, within 14 days and if verbally, within seven days after delivery of the Goods to the Buyer, provided that in each case a receipt signed by the Buyer and given to the carrier acknowledging delivery of a quantity of Goods shall be conclusive evidence of the quantity delivered to the Buyer by the Company.
- 6.11 Receiving Goods: The Buyer must ensure that it is ready and capable to accept delivery on the delivery date and that adequate facilities exist to accept and properly store the Goods. If the Goods are unable to be promptly discharged or delivered, the Buyer shall compensate the Company for any costs incurred by the Company as a result of any delay encountered.
- 6.12 Insurance by the Buyer: The Buyer shall insure the Goods, from time to time, in the joint names of the Company and the Buyer and shall have the following statement noted on such insurance cover: "Loss if any shall be payable to the Company whose receipt shall be a sufficient discharge", unless otherwise agreed by the Company in writing. The Buyer shall, if required by the Company, provide the Company with evidence that the Goods are fully insured in respect of any loss of or damage to the Goods.
- ## 7. PERSONAL PROPERTY SECURITIES ACT 1999
- 7.1 Security Interest: The Buyer grants the Company a security interest in the Goods and their proceeds (in whatever form those proceeds take) to secure the obligations and liabilities of the Buyer under the Agreement. If any of the Goods and/or their proceeds are not readily identifiable and/or traceable, the Buyer grants the Company a security interest in all of the Customer's property of which the Goods form part.
- 7.2 Ordinary Course of Business: Unless otherwise notified in writing to the Buyer by the Company, the Buyer is authorised to sell the Goods in the ordinary course of business, provided that the proceeds of any Goods sold shall be kept in a separate account and shall not be mixed with any other moneys, including funds of the Buyer.
- 7.3 Fiduciary Bailee: Property and ownership in the Goods remains with the Company and will not pass to the Buyer until the Company receives payment in full of the invoice relating to the Goods. Until property passes to the Buyer, the Buyer shall hold the Goods as fiduciary bailee for the Company. The Buyer shall store the Goods separately and in a manner to enable them to be identified and cross referenced to particular invoices.
- 7.4 Assistance: As and when required by the Company, the Buyer will, at its own expense, provide all reasonable assistance and all relevant information to enable the Company to register its security interest, maintain such registration, and enforce its rights pursuant to its security interest.
- 7.5 Change of Name: The Buyer will not change its name without giving the Company 7 days prior written notice.
- 7.6 Access to Premises: The Buyer irrevocably authorises the Company, its agents and employees, to search for and remove the Goods (and if any Goods are wholly or partially attached to or incorporated in any other goods, sever or disconnect the Goods from those other goods) and for that purpose to enter into any premises where they may be found using such force as is necessary. The Buyer will indemnify the Company against any costs and liabilities that may arise directly or indirectly as a result of the entry by the Company, its agents or employees into any premises or the seizure by the Company of any Goods (or the severing or disconnection of such Goods from other goods) under this clause.
- 7.7 Contracting Out: The Buyer waives its right to:
- (a) receive a statement of account pursuant to s116 of the PPSA;
 - (b) receive notice of the Company's proposal to retain collateral under s120(2) of the PPSA and to object to that proposal under s121 of the PPSA;
 - (c) receive notice from the Company under s114(1)(a) of the PPSA that the Company intends to sell certain goods in which it has a security interest;
 - (d) not have goods damaged if the Company removes an accession under s125 of the PPSA;
 - (e) to receive notice of the removal of an accession under s129 of the PPSA;

TERMS AND CONDITIONS OF SALE

- (f) to apply to the Court of an order concerning the removal of an accession under s131 of the PPSA; and
- (g) to reinstate a security agreement under s133 and/or 134 of the PPSA.
- 7.8 Release of Security Interest: The Company will not be obliged to discharge its security interest or register any financing change statement under the PPSA unless:
- (a) all obligations and liabilities of the Buyer under the Agreement have been performed in full, including payment of all moneys owing under the Agreement; and
 - (b) any costs incurred in doing so have first been paid by the Buyer; and
 - (c) the Company is satisfied that any amounts paid by the Buyer to the Company or received prior to that release are not at risk of subsequently being set aside by the operation of any law, or of any claim to priority over the Company's security interest in such amount; and
 - (d) if any payment to the Company is avoided or otherwise becomes payable to the Buyer or to any other person, to the extent possible the relevant release will have no effect, and the signing by the Company of any release or the registration of a financing change statement discharging the Company's security interest in relation to any Goods will not prevent the Company from registering another financing statement or otherwise recovering any amount which is due to the Company in such manner as it may be entitled to do.

1. SAFETY

- 8.1 The Buyer shall take all practicable steps to prevent accident or injury to persons at any place of work under the Buyer's control.
- 8.2 In particular the Buyer shall:
- (a) take all reasonable and prudent measures to keep any Goods secure and in a safe place (whether in use or not);
 - (b) handle the Goods or permit them to be handled only by properly skilled and experienced persons who are not under the influence of alcohol or drugs and in accordance with the requirements of any label or instruction on the Goods, and applicable laws on safe handling;
 - (c) ensure that the Goods are sold solely for the purposes intended by the manufacturer having regard to their capabilities and limitations;
 - (d) ensure that, at all times, the Buyer, its employees, subcontractors or agents will comply with all applicable laws including, but not limited to, the Health and Safety in Employment Act 1992 and the Hazardous Substances and New Organisms Act 1996.

2. PERFORMANCE OF SERVICES

- 9.1 Standard: The Services will be provided with due skill and care, in a competent and professional manner and in compliance with all relevant laws in New Zealand.
- 9.2 Access to premises: In providing the Services, the Company may require assistance from the Buyer and access to the Buyer's premises. The Buyer will:
- (a) promptly provide the Company any required material, data, or other information;
 - (b) perform any tasks the Company reasonably requests the Buyer to carry out;
 - (c) allow the Company access to the Buyer's premises; and
 - (d) comply with any reasonable instructions from the Company.
- If the Buyer fails to provide or carry out any of the above requirements, the Company will not be liable for any failure or delay in providing the Services and the Company may charge, and the Buyer will pay, any costs relating from such failure.

3. AUTHORISATIONS

- 10.1 Authorisation: It is the Buyer's risk and responsibility to obtain every necessary or prudent authorisation (including licences, permits and consents) to buy, possess, use, export, import or resell any Products and to ensure that the Products are purchased by an authorised person.
- 10.2 Buyer Indemnities: The Buyer shall indemnify the Company from any liability that may arise for any breach by, or on behalf of the Buyer, to obtain every necessary authorisation.
- 10.3 Notify: The Buyer shall notify to the Company in writing of the names of its personnel authorised to place orders on the Buyer's behalf and must advise in writing if any such authority is later withdrawn. The Buyer shall be solely responsible for supervising the use of the account and absent specific written advice of authorised personnel, the Company has no obligation to enquire into the authority of any person placing orders on any account in the name of the Buyer. Any orders made by an authorised person

prior to the Company receiving written notice from the Buyer withdrawing that person's authority, shall be paid for by the Buyer.

4. PURCHASES OF PRODUCTS FOR BUSINESS PURPOSES – LIMITATION OF LIABILITY

- 11.1 If the Buyer acquires the Products from the Company for the purposes of a business in any way, or the Buyer holds itself out as acquiring the Products for the purposes of a business in any way, the Buyer agrees to the following terms;
- (a) the conditions, warranties and guarantees, representations and descriptions in the Sale of Goods Act 1908 and the Consumer Guarantees Act 1993 ("CGA") or implied by law, trade or custom will not apply and are excluded from the Agreement; and
 - (b) no claims for alleged defective Goods will be recognised unless made in writing and received by the Company within 14 days after delivery; and
 - (c) the Buyer may not claim any of the remedies in the CGA from the Company or from any contract or to the Company or manufacturer of the Goods or from any manufacturer of any components or parts in the Goods; and
 - (d) the only warranties, representations, conditions and agreements in respect of the Products are those which are contained in the Agreement or expressly authorised or confirmed in writing by the Company; and
 - (e) the Company's liability in respect of all claims for loss, damage or injury arising from the breach of its obligations under the Agreement or in connection with the Products, from failure to perform the Company's warranty obligations or from negligence on the part of the Company, its employees, agents or contractors, shall be limited (at the Company's option) to repair or replacement of the Goods or Services or re-performance of the Services or credit, and shall not in aggregate exceed in value the price invoiced to the Buyer for those Goods;
 - (f) the Buyer shall use its best endeavours to minimise loss and damage arising from any alleged defect; and
 - (g) neither the Company, its employees, agents or contractors will be liable to the Buyer, its employees, agents or contractors for any consequential loss or damage howsoever caused. This exclusion of liability includes, but is not limited to, consequential loss or damage arising from suspension of performance of the Agreement pursuant to clause 5, delays in manufacturing, negligence, delivery and the costs incurred in returning any Goods to the Company or any manufacturer. This exclusion applies whether the consequential loss is incurred by the Buyer or a third party.

5. BUYER WARRANTIES AND INDEMNITIES

- 12.1 Warranties: The Buyer warrants that if it purchased any Goods from the Company for resupply as, or incorporates any Goods into, goods ordinarily acquired for personal household or domestic use (Consumer Goods), it will supply the Consumer Goods on the following conditions:
- (a) If it supplies the Consumer Goods for resupply by its customer, it will ensure that its terms and conditions of supply require its customer and each person in the distribution chain to include in its supply agreements or conditions of sale obligations requiring its customer to exclude liability for any claims under the CGA, but only where the end user/consumer acquires the Consumer Goods for business purposes;
 - (b) If it supplies the Consumer Goods directly to an end user/consumer, it will do so using terms and conditions of supply which exclude liability for any claims under the CGA, but only where the end user/consumer acquires the Consumer Goods for business purposes.
- 12.2 Indemnities: The Buyer agrees to fully indemnify the Company for, and on demand pay the Company, all costs (including costs calculated on a lawyer and own client basis), losses, damages, expenses and claims incurred or which the Company is or becomes liable for as a consequence of or in connection with:
- (a) the Buyer's failing to comply with or breach any of its obligations under the Agreement; and
 - (b) any claim or legal proceedings the Buyer or any other person brings against the Company or any person acting as the Company's agent in the exercise of the Company's rights under the Agreement; and
 - (c) anything done or not done in good faith in the exercise or attempted exercise by the Company of its rights under the Agreement; and
 - (d) any amount that the Buyer fails to pay on the due date for payment; and
 - (e) the exercise, enforcement, preservation or attempted exercise, enforcement or preservation of any of the Company's rights under the Agreement, or in suing for and recovering any

moneys that the Buyer owes or is liable to pay to the Company or indemnify the Company for; and

- (f) taking any actions or doing any things (including paying or incurring liabilities to pay any moneys) to protect or preserve the Company's rights under the Agreement, including the security interest granted to the Company pursuant to the Agreement;
 - (g) any failure by the Buyer, its customers or any person in the distribution chain to properly contract out of liability to business end users/consumers under the CGA.
- in all cases on a full indemnity basis.

6. PRIVACY ACT 1993

- 13.1 The Company will hold any personal information received from the Buyer for marketing, product development, account administration and credit purposes. The Company may disclose personal information about the Buyer to any person the Buyer names as a credit referee or to any person for the purpose of securing the Company's security interest granted pursuant to the Agreement. Failure by the Buyer to supply personal information for these purposes entitles the Company to withdraw or refuse credit to the Buyer and to repossess any Goods in the possession or control of the Buyer.

7. INTELLECTUAL PROPERTY

- 14.1 The sale of any Products by the Company to the Buyer does not give the Buyer the right to use, sell, disseminate or duplicate any of the Company's trademarks, copyrights, designs or other intellectual property rights (unless agreed otherwise by the Company in writing).

8. GENERAL

- 15.1 Severance: If any clause or part of a clause of these Terms of Trade and each Contract is held to be invalid or unenforceable for whatever reason, to the extent not inconsistent with that invalid clause, the remaining provisions shall remain in full force and effect.
- 15.2 Entire Agreement: The Agreement constitutes the entire agreement of the Parties in respect of the Products and replaces any previous agreements and understandings. The terms and conditions of the Agreement, will prevail over any existing or subsequent terms and conditions set out in any document (including any Buyer purchase order), unless agreed otherwise in writing by the Company.
- 15.3 Waiver: No waiver of any breach of, or failure to enforce any provision of, the Agreement at any time by any party will in any way limit the right of such party thereafter to enforce and compel strict compliance with the provisions of the Agreement.
- 15.4 Force Majeure: The Company shall not be liable for any delay in performing its obligations under the Agreement to the Buyer in whole or in part by force majeure which shall include (but not be limited to) an act of God, weather conditions, natural disasters, strikes, lockouts, fire, war, suit, civil commotion, inability to obtain Goods, Services or supplies including the imposition of any export or import bans or any other cause beyond the reasonable control of the Company.
- 15.5 Variation:
- (a) This Agreement (these Terms of Trade and the Contract for the Products) shall not be modified unless agreed in writing by the Parties.
 - (b) The Company may amend the Terms of Trade, from time to time, by notice to the Buyer. Any instructions received by the Company from the Buyer for the supply of Products shall thereafter constitute acceptance of these Terms of Trade.
- 15.6 Assignment: The Buyer is not entitled to assign, transfer or otherwise dispose of any of its rights or obligations under the Agreement to anyone else without the Company's prior written consent. The Company shall be entitled to assign, transfer or dispose of any or all of its rights and obligations under the Agreement to any other person without the prior consent of the Buyer.
- 15.7 Notice: Unless agreed otherwise in writing, all notices under the Agreement shall be served in writing to the registered offices of the Parties.
- 15.8 Errors and Omissions: Errors and omissions of a clerical nature in quotations, invoices or statements shall be subject to correction.
- 15.9 Legislation: a reference to any legislation or to any provision of any legislation (including regulations and orders) includes that legislation or provision as from time to time amended, re-enacted or substituted and any statutory instruments, regulations and orders issued under any such legislation or provision.
- 15.10 Governing Law: The Agreement shall be governed by, and construed in accordance with, the law of New Zealand.

Updated December 2015

CROPLANDS WARRANTY POLICY

Please be advised that until the Croplands Warranty Registration Card sent with each sprayer is completed by the purchaser of a Croplands unit, the sprayer is deemed to be void of any warranty. This warranty registration is to be completed and returned immediately to: Croplands Equipment Pty Ltd, PO Box 2441, Dry Creek, South Australia 5094, and marked attention of Service Manager. It is highly recommended that as part of the sales process, the warranty policy is read and discussed with the customer to ensure there is no confusion as to what is, and what is not, covered by warranty. The Warranty Registration Card requires a signed declaration that the purchaser understands the warranty policy of Croplands. This is in your best interest as an agent for Croplands and will better serve your customer in the long term.

FREIGHT

All orders over \$3,000 retail value excluding GST will be sent freight free throughout New Zealand with the following exceptions:

- » **Any capital products specifically imported** or indented where freight charges will be negotiated at the time of the sale process (e.g. Self-Propelled sprayers and large Broadacre units coming from Europe or USA).
- » **Tanks** » **AgriPak linkage sprayers**
- » **Booms** » **300L trailed sprayer**
- » **Fertiliser spreaders**
- » For all orders under the retail value of \$3,000 + GST, **the table below sets out the freight that will be charged** on individual items
- » For orders that combine multiple products that fall under the \$3,000 threshold, the most cost effective freight cost will be sought by our customer service and despatch team to minimise the freight cost. Alternatively you can specify a carrier under your own freight forwarding arrangements.

TABLE 1: WHOLEGOODS – SENT BY ROAD FREIGHT OR COURIERS

All freight prices include any applicable fuel surcharges and remote area surcharges.

ITEM	FREIGHT \$(EX. GST)
Linkage sprayers (P6–17)
