

PGW Sports Mix 13.2-2-16.7

NPK: 13.2-2-16.7 + 1% Fe, 13% S, 0.15% Mg

Benefits

- Excellent nitrogen to potassium ratio.
- Competitively priced fertiliser.
- Excellent choice for budget turf surfaces, sports fields, school grounds and fairways.
- 1% Fe for immediate colour response.

PGW Sports Mix 13.2 – 2 – 16.7 is an economical way of applying nitrogen fertiliser to broad acre sports turf. The upfront form of nitrogen in this product provides immediate response to stimulate leaf growth and intensify colour. It will provide excellent early season results in bringing up nutrient levels after a wet and depleting winter. The economical price of this upfront nitrogen fertiliser means it has become the choice of many schools and broad acre turf managers whose budgets restrict the use of more expensive slow release fertilisers. PGW Sports Mix 13.2-2-16.7 also contains 1% iron, which gives a colour response.

Application rates

Apply at 20-25 g/m² (200-250 kg/ha) as required.
Apply to dry turf and follow with sufficient irrigation or rainfall to wash into the turf surface.

Caution: This product may burn if not washed in after application.

Guaranteed analysis

13.2% Total nitrogen
13.2% Ammoniacal nitrogen
2.0% Available phosphate (P₂O₅)
16.7% Soluble potash (K₂O)
12.6% Sulfur (S)
1.0% Iron (Fe)

DERIVED FROM: Ammonium sulphate, muriate of potash, diammonium phosphate, kieserite and ferrous sulphate monohydrate.
