

Merlot creeping red fescue

Key features:

- Drought tolerant
- Dollar spot resistant
- Shade tolerant
- Low fertility requirement
- Underground stems

Requires less water and chemicals to achieve optimum turfgrass performance. This drought tolerant and disease resistant variety is good for you and for our environment. Recommended for use in park settings, golf course roughs and fairways, home lawns and landscape areas.

Sowing rate

20 – 35 g/m² (200 – 350 kg/ha)

Maintenance and mowing

Height: 25 – 75 mm

Fertiliser: 150 – 250 kg/nitrogen/ha a year. Apply during periods of active growth (September – November, March – May)

Mowing: 2 times/week during active growth and remove no more than 1/3 of the leaf per mowing

The turf to stage the world's greatest endeavours.
