

Survivor chewings fescue

Key features:

- Drought tolerant
- Maintains cover, dark colour and top quality
- Dollar spot resistant
- Shade tolerant
- Low fertility requirement

This cultivar exhibits a high level of drought tolerance, resulting in lower water usage. It is shade tolerant and performs well in full sun. A minimal amount of fertiliser is required to keep a healthy turf. Recommended for use in home lawns, parks, reclamation sites and golf courses.

Sowing rate

20 – 35 g/m² (200 – 350 kg/ha)

Maintenance and mowing

Height: 25 – 75 mm

Fertiliser: 150 – 250 kg/nitrogen/ha a year. Apply during periods of active growth (September – November, March – May)

Mowing: 2 times/week during active growth and remove no more than 1/3 of the leaf per mowing

The turf to stage the world's greatest endeavours.
