line marking systems

The Contractor Professional Line Marker

- 34 litre tank which is detachable for easy cleaning.
- Capacity for multiple ground marking.
- Simple, trouble free componentry.

The Contractor Professional Line Marker has a greater capacity tank than many others on the market ensuring that sportsfields can be marked without running out. Easy snap-lock detachable lines and tank make it easy to wash out and set wheels make operating the machine straightforward. With the flick of a switch, the line is applied by a fan nozzle onto the grass sward. The fresh water 'wash through' makes cleaning up a breeze. Updates from the old machine include bigger batteries for longer life, side mount brackets for more flexibility, flushing system for easy cleaning and a handy tool box on the handlebar.

Suitable for

- Stadia.
- Sportsfields.
- Athletic tracks.
- Tennis courts.
- Cricket wickets.
- Bowling greens.
- School grounds.

Benefits

- Large 34 litres capacity; less likely to run out half way through the field. Ideal for venues with multiple fields.
- 12 ltr flush system.
- Simple componentry, easy clean filters, snap lock nozzles and hoses.
- Spray fan to create line.
- Forward marking discs to sharpen lines and define width.
- Set wheels for 'straightness' of line.
- Further attachments such as the athletics attachment, spray wand, mini boom spray and side mount are also available.
- Fresh water 'wash through' system for cleaning after use.

Application rates

The Contractor Professional Line Marker machine uses DuraTurf Sportline, Duramark or Stadia line marking liquid mixed with water to a standard dilution ratio.

Approximately 20 ltr of mix is used for a full sized rugby field and depending on factors such as wear, rain and growth (mowing), the lines last from 10 days to 4 weeks or more.
