

Andersons 28-1-8 50% (28-3-10 Oxide) Poly Sport 50% PCSCU

- Contains NS-54™ as 50% (PCSCU).
- Early season option.

Benefits

- Contains NS-54™ PCSCU with slow release from polymer coating.
- Uniform particle size – excellent spreader ballistics.
- Low burn potential.
- Complete fertiliser.
- Economically priced.

28-1-8 Poly Sport with 50% PCSCU and 28-1-8 Poly Sport with 96% PCSCU contain polymer coated sulphur coated urea as a source of slow release nitrogen. They provide turf with a balance of nutrients for maintaining strong vigorous turf. The uniform particle size ensures easy and accurate spreading onto turf swards.

Application rates

Apply at 20 g/m² (200 kg/ha) as required.

Pack size: 25 kg (40 bags per tonne).
