

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

INJECTAFORCE

SOIL PENETRANT

NONIONIC SOIL WETTING AGENT

ACTIVE CONSTITUENTS
ALKOXYLATED BLOCK COPOLYMERS
ALKYL POLYGLUCOSIDES AND ALKYL POLYETHERS

IMPROVES PENETRATION AND INFILTRATION
OF WATER THROUGH SOIL AND THATCH PROFILES

APPLIED BY CONVENTIONAL SPRAY
OR THROUGH IRRIGATION SYSTEMS

20 LITRES

HAZARD CLASSES 6.3B, 6.4A TOXIC HSR006701

SAFETY WARNING: Harmful. May cause irritation to eyes and skin.

ENVIRONMENTAL WARNING: Avoid contaminating waterways.

PRODUCT DISPOSAL: Do not allow product to enter waterways, drains or sewers. Absorb spillage on inert material such as soil and dispose of in a suitable landfill.

CONTAINER DISPOSAL: Triple rinse container and return to recycler. Alternatively, ensure container is completely empty, burn if permitted and circumstances, especially wind direction allow, otherwise bury in landfill.

HANDLING PRECAUTIONS: When mixing or applying wear protective clothing, goggles or face shield and respirator if risk of inhalation. Do not eat or drink while using. Wash hands and face before meals and after work. Wash protective clothing after work.

STORAGE: Store in original container tightly closed and in dry, cool, well ventilated area, away from foodstuffs.

FIRST AID: If swallowed DO NOT induce vomiting. Rinse mouth with water and give water to drink. For advice, contact the **National Poisons Centre 0800 POISON (0800 764 766)** or a doctor immediately. If skin, hair or eye contact occurs, remove contaminated clothing and flush skin, hair and/or eyes with running water for several minutes. Additional information is contained in the **Material Safety Data Sheet** which is available from the reseller at point of purchase or visit www.sstnewzealand.co.nz for alternate contact details.

Directions for use

Situation	Application Rate	Critical comments
Turf Management Injection	2 Ltr per Hectare	Apply monthly or as required throughout the growing season. For more demanding areas.
	4 Ltr per Hectare	
	1 - 2 Ltr per Hectare	For application each two weeks.
Conventional Sprayers	2.4 – 5 Ltr/Ha.	Monthly application for broad acre areas.
	Water rate 500 Ltr/Ha	Follow normal irrigation schedule.
Injectaforce does not usually require to be watered-in following application, however turf should be irrigated before next mowing. If applied in very dry conditions follow up with watering-in.		
Tank Mixing	200 mL per 100 Litres	Injectaforce is compatible with most chemicals, however, effect of the mix <i>must</i> be tested on turf to determine if safe to use.

GENERAL INSTRUCTIONS

Injectaforce is a formulated nonionic soil penetrant that improves the penetration and infiltration of applied irrigation water. Injectaforce may be applied through conventional sprayers or by irrigation systems. Injectaforce can be applied to all fine turf species. Application is monthly or as required.

MIXING

Injectaforce mixes easily with water. Half fill spray tank, add Injectaforce and top up with hose under water level.

CONDITIONS OF SALE: The use of Injectaforce being beyond the control of the manufacturer, no warranty expressed or implied is given by SST New Zealand LTD. regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and SST New Zealand LTD. accepts no responsibility for any consequences whatsoever resulting from the use of this product.
