

DuraVeg® Rye Clover Blend

Key features:

- Fast establishment
- Nitrogen fixing
- Drought tolerant
- Wide adaption

DuraVeg Rye Clover Blend consists of fast establishing cultivars to ensure ground cover is established quickly. It has the added benefit of a legume to assist in the sustainability of vegetation in infertile soils. Although commonly used in the agriculture sector, the DuraVeg Rye Clover Blend also fits as a solution to the revegetation of disturbed lands.

Quantity	Species
90%	Perennial ryegrass
10%	White clover

**Proven systems that reclaim
and restore environments.**
