

GRT: Wet-Loc Technical Data Sheet

Lock Down Your Dust - Long Term!

GRT: Wet-Loc is an environmentally friendly, clear, highly refined synthetic fluid designed as a long lasting dust control agent. It has been designed to handle heavy and damaging traffic movements for up to 6 months, making it perfect for:

- ➔ Packing and loading yards
- ➔ Container yards and ports
- ➔ Heavy or tracked machinery yards or access roads
- ➔ Haul roads
- ➔ Underground mining
- ➔ Racetracks and horse arenas

Application

1. **GRT: Wet-Loc** is NOT watered down or diluted with other liquids.
2. Ensure surface is dry before application of product.
3. Best surface has about 10 to 20mm of dust available.
4. Spray **GRT: Wet-Loc** directly onto the dusty road or yard surface.
5. Water trucks or existing farm sprayers can be used to apply. Sprayer position is best as low to the ground as practical to avoid product drift.
6. **Application Amounts:** Range is between 0.5 to 1L/m². For deep treatment applications (e.g. horse arenas) as a guide, apply 1L/50mm depth of treatment required.

Handling & Storage

Product is non toxic and non hazardous. Standard PPE is adequate for handling and application. Normal measures for preventive fire protection. Product is combustible, NOT flammable. Protect storage containers against physical damage. Store at ambient temperature or with lowest necessary heating, as handling requires.

Helpful and Handy Hints

- ➔ Although areas treated with **GRT: Wet-Loc** may be trafficked immediately, it is recommended to allow the product to penetrate fully first.
- ➔ Avoid tracking material onto bitumen or asphalt as these surfaces can become greasy.
- ➔ Hoses and pumps used to apply **GRT: Wet-Loc** can be easily cleaned with a solution of water and standard dishwashing detergent
- ➔ Avoid spraying concrete, plant or equipment as the product has the potential to stain.

KEY BENEFITS

- **No ongoing watering requirements**
- **Long-term performance with outstanding UV resistance and stability**
- **Actively re-workable and self-healing**
- **Non-slip finish** and safe to drive on once product has penetrated the material
- **Safe for workers and environmentally friendly**
- **Non-film forming** makes it perfect for yards, hardstands and roads with heavy truck, tractor, chained wheels or track movements
- **Formulation resists being washed out by rain** unlike many dust suppression products in the market

Quality Assured

GRT's quality management system is certified to ISO 9001 standards, and our products are approved and used by Industry leading companies, worldwide.
