**HSNO Class: 6.1D, 9.3C**

**WARNING:**

May be harmful if swallowed, inhaled or absorbed through the skin.

HARMFUL to terrestrial vertebrates.

**HANDLING PRECAUTIONS:** When mixing or applying, wear protective clothing, gloves and goggles. Do not eat or drink while using. Wash hands and face before meals and after work. Wash protective clothing after work.

**STORAGE:** Store in original container tightly closed and in a locked, dry, cool, well ventilated area, away from feed, seeds and foodstuffs. Storage must be in accordance with NZS8409 Management of Agrichemicals. See the Product Safety Card for further information.

**PRODUCT DISPOSAL:** Ensure unwanted product is used by another operator strictly in accordance with label directions. Do not allow product to enter waterways, drains or sewers.

**CONTAINER DISPOSAL:** Ensure container is completely empty. Submit clean empty container for recycling through Agrecovery. If this is not possible, bury in an approved landfill.

**FIRST AID:** If swallowed do NOT induce vomiting. For advice, contact the National Poisons Centre **0800 POISON (0800 764 766)** or a doctor immediately. If skin, hair or eye contact occurs, remove contaminated clothing and flush skin, hair and/or eyes with running water for several minutes.

**PRODUCT INFORMATION**

**ACTIWETT** is a general purpose, non-ionic surfactant designed to improve the coverage of crop protection products. **ACTIWETT** reduces the surface tension of the spray and increases the spread over the surface of the plant to assist in spray coverage. **ACTIWETT** will enhance the coverage and adherence to waxy and hairy hard-to-wet surfaces. **ACTIWETT** aids the coverage and penetration of the sprays into cracks and crevices and will form an even spray on the target plants. **ACTIWETT** also resists light rainfall and reduces the erosion of the chemical from the leaves. If good rain protection is required use BondXtra® or Du-Wett WeatherMax® for improved sticking in wet conditions.

**RECOMMENDATIONS**

Follow the crop protection product labels for specific recommendations on non-ionic adjuvants.

**Insecticides, Fungicides and Plant Growth Regulators:** – use 25 mls/100 litres of water. On hard to wet surfaces, e.g. grape bunches, forage brassicas, cabbages, onions etc, increase the rate to 50 - 75 ml/100 litres water.

**For vineyard grapes:** Use with sulphur and other fungicides and insecticides at 75 ml/100 litres.

**Herbicides:** Use 25 ml/100 litres. With **Dy-quat®** use 25 - 50 ml/100 L of water and follow the herbicide label recommendations. Do not use with selective herbicides unless a non-ionic surfactant is recommended.

**Use with sulphur:** When used with sulphur products, refer to the sulphur label for temperature use restrictions.

**Bee warning:** This product has not shown toxicity to bees in NZ testing. Do not apply any mixtures where bees may be working and observe the bee warnings on partner products.

**WARNING:**

- DO NOT USE ON FRUIT CROPS, TABLE GRAPES OR ORNAMENTAL CROPS INCLUDING THOSE GROWN FOR CUT FLOWERS, FOLIAGE AND NURSERY PLANTS.

Use an alternative adjuvant with a proven history of crop safety

- **ACTIWETT** may induce increased levels of russet in apples, pears and other russet prone crops.

**COMPATIBILITY**

**ACTIWETT** is compatible with most commonly used insecticides, fungicides, herbicides and foliar fertilisers.
