4. FIRST AID MEASURES

Consult the National Poisons Information Centre 0800 POISON (0800 764 766) or a doctor in every case of suspected chemical poisoning. Have product label or Safety Data Sheet at hand.

INGESTION: Immediately call POISON CENTRE or doctor for advice. Rinse mouth. Do not induce vomiting unless advised to do so. If at hand, advice may be to give one atropine tablet (0.6 mg) every 5 minutes until dryness of mouth occurs.

SKIN CONTACT: Wash with soap and water. If irritation develops or person feels unwell, obtain medical advice.

EYE CONTACT: Flush with running water for at least 15 minutes. Remove contact lenses if present, and easy to do after 5 minutes before continuing rinsing. If irritation develops, obtain medical assistance.

INHALATION: Remove patient to fresh air and keep at rest until recovered. Call a POISON CENTRE or doctor for medical advice.

First Aid facilities:

Provide eye baths and safety showers close to work areas.

Advice to Doctor:

Bendiocarb is a carbamate insecticide, which is a reversible cholinesterase inhibitor. Atropine, preferably by injection, is an antidote. Additionally, a benzodiazepine (e.g. diazepam) should be given in case of seizures/convulsions.

5. FIRE-FIGHTING MEASURES

Flashpoint: Non-flammable.

Suitable extinguishing media: Water fog, fine water spray, carbon dioxide, dry chemical, foam.

Hazards from combustion products: At temperatures above 125 °C will evolve toxic fumes of methyl isocyanate. At temperatures above 125 °C will evolve toxic fumes of methyl isocyanate.

Precautions for fire fighters and special protective equipment: Self-contained breathing apparatus with full face-piece and protective clothing. Cool fire exposed containers with water spray.

Hazchem Code: 2X

6. ACCIDENTAL RELEASE MEASURES

Emergency Procedures:

Wear appropriate personal protection equipment to prevent exposure by inhalation, and to skin and eyes. Avoid dust generation. Ensure adequate ventilation. Wear approved respirator where mist or dust of unknown concentration may be generated. Self-contained breathing apparatus is recommended. Contain spillage and prevent from entering drains, sewer or any water course.

Methods and materials for containment

Dyke and contain solid or liquid with sand, earth, sawdust or vermiculite and transfer liquid and solids separately to labelled containers for recovery or disposal. Clean up and report spills immediately. Keep spills out of sewers and open bodies of water. In event of spillage contaminating a water-course, notify the Police, local Health Protection Officer and Council.

Clean contaminated surfaces with water.
