

## **Soil Testing Service**

- This professional turf management service from PGG Wrightson Turf takes the guesswork out of determining turf fertiliser requirements.
- Provides an indication of important nutrient levels and soil chemical factors that influence turf quality.
- Allows an accurate estimate of the type and quantity of nutrients required to balance the soil.
- Ensures time and money is not wasted by applying unnecessary materials.
- Is useful in planning fertiliser programmes for the following season.
- Complete nutrient analysis is available – pH, P, Ca, Mg, K, Na, CEC, BS, VW.
- Provides a soil analysis report form.
- Is easy to read and understand.
- Presents data in bar graph form for an easy comparison between samples.
- Residual herbicide analysis also available to help test for heavy metals.

***The turf to stage the world's  
greatest endeavours.***
