

## Rebel Xtreme Tall Fescue

### Key features:

- Drought tolerant
- Dark colour and good density
- Extended root technology
- Rapid establishment
- Tolerant of low cutting height

Rebel Xtreme was developed to combat the stresses of summer such as diseases and drought pressures. Rebel Xtreme has a deep root system which provides a turfgrass that establishes quickly. The deep roots enhance its drought tolerance and aids in nutrient uptake at lower soil depths. Rebel Xtreme is recommended for use in home lawns, fields and parks, sod farms and golf courses.

### Sowing rate

- 3 – 5 kg/100m<sup>2</sup> (300 – 500 kg/ha) – Golf courses (fairways & roughs)
- 3 – 5 kg/100m<sup>2</sup> (300 – 500 kg/ha) – Home lawns, parks & sod farms

### Maintenance

- Mowing height: 40 mm – 75 mm

**The turf to stage the world's greatest endeavours.**
