 Optimum range

Other Syngenta Turf Nozzle range availability:

	Size	Typical water volume (L/ha)	Typical spraying speed (km/hr)	Recommended use
	025	220 – 400	3 – 5	Foliar applications on greens and tees
	08	450 – 1000	5 – 7	Wetting agents and soil applications

For nozzles contact your local Syngenta Agent.

The rearwards spray angle compensates for the forward movement of the sprayer, delivering better all round coverage of the turf leaf.

Ridge on nozzle tip should face direction of travel

Angled spray

Fit Syngenta Turf Nozzles so that the angled spray pattern faces rearwards. Insert nozzles into the bayonet with the Syngenta logo and moulded arrow on the nozzle to the front (facing direction of travel).

Syngenta Turf Nozzles fit ISO standard bayonet caps on most sprayers. Hardi sprayers will require bayonet adapters.

Even coverage

Syngenta Turf Nozzles have been specifically designed to cope with and maintain even coverage when spraying undulating ground.
