

DuraTurf[®] Matrix

Key features:

- Binding strength
- Rapid establishment
- Increased wear tolerance and recovery

DuraTurf[®] Matrix has been specially designed to stabilise sandy or sandy loam sportsfields that receive extensive use. The tall fescue component with its extensive root system creates a chicken wire effect, locking the soil particles together, so where turf cover is lost the soil remains stable. This will ensure safe playing conditions, even under worn situations.

Cultivar	Species
Colosseum	Perennial ryegrass
Arena 1	Perennial ryegrass
Lagertha	Tall fescue

Application rates

Sowing rate: 30 - 50 g/m² (3 - 5 kg/100 m²)
Oversowing: 25 - 35 g/m² (2.5 - 3.5 kg/100 m²)

Mowing height

Down to 25 mm for match play

**The turf to stage the world's
greatest endeavours.**
