

Andersons 32-1-8 + 2% Fe (32-3-10 Oxide) Poly Sport 30% PCSCU

Benefits:

- Uniformity. No dust, particles are 2.40 mm.
- 30% NS-54™ PCSCU slow release, remainder “up front” for immediate noticeable improvement.
- Consistent spreading. Complete early season fertiliser.
- Contains 2% iron for immediate colour response.

32-1-8 is a mainly “up front” fertiliser which is price competitive in the fairway and sportsfield market. A valuable attribute is its consistent and small 2.40 mm particle size, with no dust, making spreading accurate and uniform. It is a complete fertiliser with 2% iron which assists in vigorous strong turf growth and great colour. It generally gives an immediate colour response. Excellent early season product with sufficient up front nitrogen to boost early season nutrient levels.

Application rates

Apply 20 g/m² (200 kg/ha) as required.

Pack size: 25 kg (40 bags per tonne).
