

Amino Fertiliser 13-2-6

Amino Acid & Humic Acid Coated NPK Fertiliser

Benefits

- Cost effective, great colour and longer lasting.
- Provides readily available NPK nutrients.
- Humic acid for better utilisation and longevity of nitrogen.
- Amino acids for increasing tolerance to environmental stress.
- Ideal maintenance or base fertiliser.
- Reduced nutrient leaching from the profile.

DuraTurf Amino Fertiliser is a blended NPK fertiliser with the additional benefits of amino acids and humic acids. Amino Fertiliser delivers lasting colour and complete nutritional benefits with less potential for environmental losses. Amino Fertiliser is recommended for use on warm and cool season turf, trees and ornamental plants.

Application rates

Apply at 200-300 kg/ha as required.

Apply to dry turf and follow with sufficient irrigation or rainfall to wash into the turf surface.

Guaranteed analysis

Nitrogen: 13% minimum

Phosphorus: 2% minimum

Potassium: 6% minimum

Amino Acid: 5-7% minimum

Humic Acid: 8-10% minimum

Organic Matter: 15% minimum

Storage

Store in a cool, dry and well ventilated area. Prevent direct sunlight.

Pack size: 25 kg.
