DIRECTIONS FOR USE:

Apply FoliMAX N-Forcer-N as a spray application during the growing season on all turf grasses and most landscape plants. Dilute with water, using the desired nitrogen rate per 100m² according to the application rate chart. Apply in sufficient water to achieve adequate plant coverage. Use a water volume of 8–20L per 100m² (800–2000L/Ha), depending on the application rate. Do not apply when temperature exceeds 26 °C. Irrigate with 2–5mm within 24 hours after application and avoid mowing for 24 hours following an application.
