DUAL POTASSIUM TECHNOLOGY

DIRECTIONS FOR USE:

Apply as a spray application during the growing season on all turf grasses and most landscape plants. Dilute with water, using the desired nitrogen rate per 100m² according to the application rate chart. Apply in sufficient water to achieve adequate plant coverage. Use a water volume of 5-15L per 100m², depending on the application rate. Avoid mowing for 24 hours following an application.

APPLICATION RATE CHART

K kg/100m ²	mL/100m ²	L/ha
0.06	200	20
0.075	250	25
0.12	400	40
0.15	500	50

WARNING: DO NOT GRAZE. Must not be applied to areas that may be grazed by animals.

MIXING:

Fill spray vessel with half the required volume of water. Shake container of Vigor-K and add required amount to spray tank while agitating. Add remaining water to the spray tank. Continue agitating during application. Wash out spray tank, including nozzles, immediately after use. This product is alkaline and may cause alkaline hydrolysis of some pesticides, reducing their effectiveness. The spray solution should be buffered before mixing with susceptible products. Some bubbling and emission of carbon dioxide may occur if this product is mixed with acidic fertilizers (such as sulphates). This will not impact on the product's effectiveness. If bubbling occurs when mixing with a pesticide or other chemicals, the mixture is not compatible and should not be used.

STORAGE, HANDLING & DISPOSAL:

Do not store below -16C, as crystallisation may occur. Do not contaminate lakes,

streams, dams or ponds by cleaning equipment or disposal of waste. Avoid contact with eyes and skin by wearing appropriate protective equipment, such as gloves, boots and safety goggles.

FIRST AID:

In case of contact with eyes or skin, flush at once with large amounts of water. If irritation persists, seek medical attention. If swallowed, drink large amounts of water and induce vomiting. Seek medical attention.
