

## **OARS® HS** **Soil Hydrating Surfactant**

- Contains the same Organic Acid Redistribution System in OARS®.
- Increases number of hydrating sites.
- Multi-branched hydrating soil surfactant.
- Increased length of activity in soil.
- Loosens and redistributes humic coatings from hydrophobic soil particles.

### **Benefits**

- Removes humic coatings from hydrophobic soil particles.
- Controls water repellency.
- Hydrates the soil to improve moisture retention.
- Reduces drought stress.
- Consistent performance between applications to maintain adequate moisture in hard to wet soils.

### **General information**

OARS® HS, Soil Hydrating Surfactant, is a non toxic, biodegradable formulation of multi-branched surfactants and wetting agents and a humic acid solubilising component. OARS HS controls soil water repellency while providing uniform soil moisture and increased soil moisture retention.

### **Application rates**

20-25 ltrs in 800 L of water per hectare.

**Pack size:** 9.46 litres.
