

OARS® PS **Soil Penetrating Surfactant**

- Contains the same Organic Acid Redistribution System in OARS®.
- Increases penetration of water through multi-branched penetrating technology.
- Loosens and redistributes humic coatings from hydrophobic soil particles.

Benefits

- Removes humic coatings from hydrophobic soil particles.
- Provides firm, fast surfaces.
- Improves water management efficiency.
- Controls soil water repellency.
- Longer lasting activity.

General information

OARS® PS, Soil Penetrating Surfactant, is a combination of the university researched, field proven, and patented organic acid redistribution system, OARS, and multi-branched penetrant chemistry. OARS PS controls soil water repellency while providing uniform soil moisture for a longer period of time.

Application rates

20-25 ltrs in 800 L of water per hectare.

Pack size: 9.46 litres.
