

HYDRA-PLUS

pH WATER SOLUTION

TECHNICAL GRADE WATER pH ADJUSTOR

ACTIVE CONSTITUENT:
Calcium: 48% w/v

**ULTIMATE
INDUSTRIAL**

www.ultimateindustrial.com.au

PRODUCT DESCRIPTION:

HYDRA-PLUS is a concentrated liquid suspension of Calcium Carbonate that is formulated for the use in increasing water pH levels. **HYDRA-PLUS** is much easier to handle and apply compared to other products, also minimising OH&S concerns. **HYDRA-PLUS** provides more efficient and effective results due to a high concentration and a particle size of 5 micron, compared to Bulk Lime which has a particle size of 1,000 micron (1mm) **HYDRA-PLUS** is suitable for all acid waters.

Research has proven, super fine lime particles dramatically increase the availability and the reactivity of the liming material.

APPLICATION RATES:

HYDRA-PLUS dosage rates may vary, we recommend the following application rates as a general guide.

HYDRA-PLUS dilute at 1 part product to 2 parts water as a minimum, keep agitating to prevent settling in the tank.

HYDRA-PLUS should not be mixed or applied with any other chemical unless they are suitable to a very high pH solution.

WATER pH RANGE	APPLICATION RATE
<5.0	100-125 litres per Megalitre
>5.0	75-100 litres per Megalitre

PACK SIZES AVAILABLE (LITRES): 200, 800 Litres
